Iran and an unstable Afghanistan which is perceived as a gateway to its commercial strategic ambitions in Central Asia Pakistan's key security problems are a reflection of its history and domestic circumstances The overriding concern of Pakistan is its internal and external security Strategically Pakistan lacks territorial depth Its main cities and communication routes are relatively close to the border with India and are susceptible to attack In addition the headwaters of Pakistan's rivers and main irrigation systems originate from India Pakistan's borders with India were also new and mainly unfortified and in many places were drawn in ways that made them indefensible Because the borders were also undemarcated there was abundant chance for conflict Pakistan has particularly been affected with a number of issues It has been argued by many that a Fourth generation Hybrid war has been imposed on Pakistan in order to break the nation Balkanization of Pakistan into different parts with the aim of making it either extremely weak or total destruction as a nation state so that it is not able to challenge the hegemonistic ambitions of its adversaries The purpose of this book is to assess the military security problems that Pakistan faces and focus on its external security matters military threats from neighbouring countries such as India balance of power in the region nuclear and ballistic missile threats relationship with external powers the high risk of war and its role on the War on Terror and its internal security problems sectarianism proliferation of small arms refugees ethnic violence drug problem economic weaknesses and also its ability to cope with these problems

Civilization, Nation and Modernity in East Asia Zhiyu Shi, 2012 This book explores the crisis of cultural identity which has assaulted Asian countries since Western countries began to have a profound impact on Asia in the nineteenth century Confronted by Western civilization and by modernity Asian countries have been compelled to rethink their identity and to consider how they should relate to Western civilization and modernity The result the author argues has

been a redefining by Asian countries of their own character as nations and an adaptation of civilization and modernity to their own special conditions Asian nations the author contends have thereby engaged with the West and with modernity but on their own terms occasionally and in various inconsistent ways in which they could assert a sense of difference forcing changes in the Western concept of civilization Drawing on postmodern theory the Kyoto School Confucian and other traditional Asian thought and the actual experiences of Asian countries especially China and Japan the author demonstrates that Asian countries redefining of the concept of civilization in the course of their quest for an appropriate postmodern national identity is every bit as key a part of the rise of Asia as economic growth or greater international political activity
