Science and Technology in World History James E. McClellan III, Harold Dorn, 2015-12-15 Arguably the best general history of science and technology ever published Tracing the relationship between science and technology from the dawn of civilization to the early twenty first century James E McClellan III and Harold Dorn s bestselling book argues that technology as applied science emerged relatively recently as industry and governments began funding scientific research that would lead directly to new or improved technologies McClellan and Dorn identify two great scientific traditions the useful sciences which societies patronized from time immemorial and the exploration of questions about nature itself which the ancient Greeks originated The authors examine scientific traditions that took root in China India and Central and South America as well as in a series of Near Eastern empires in late antiquity and the Middle Ages From this comparative perspective McClellan and Dorn survey the rise of the West the Scientific Revolution of the seventeenth century the Industrial Revolution and the modern marriage of science and technology They trace the development of world science and technology today while raising provocative questions about the sustainability of industrial civilization This new edition of Science and Technology in World History offers an enlarged thematic introduction and significantly extends its treatment of industrial civilization and the technological supersystem built on the modern electrical grid The Internet and social media receive increased attention Facts and figures have been thoroughly updated and the work includes a comprehensive Guide to Resources incorporating the major published literature along with a vetted list of websites and Internet resources for students and lay readers

Modern Occultism Mitch Horowitz, 2023-09-19 From Cleopatra to Chaos Magic A Vibrant Epic History of Occultism in Thought and Practice In his most sweeping historical work occult scholar and widely known voice of esoteric ideas Mitch Horowitz presents a lively intellectually serious historical exploration of modern occultism from astrology and alchemy to the dawn of Theosophy and modern witchcraft and the spiritual revolutions that followed In this

The Bookseller ,1892 [Economic Theory and Cognitive Science](#) Don Ross,2007-01-26 In this study Don Ross explores the relationship of economics to other branches of behavioral science asking in the course of his analysis under what interpretation economics is a sound empirical science The book explores the relationships between economic theory and the theoretical foundations of related disciplines that are relevant to the day to day work of economics

the cognitive and behavioral sciences It asks whether the increasingly sophisticated techniques of microeconomic analysis have revealed any deep empirical regularities whether technical improvement represents improvement in any other sense Casting Daniel Dennett and Kenneth Binmore as its intellectual heroes the book proposes a comprehensive model of economic theory that Ross argues does not supplant but recovers the core neoclassical insights and counters the caricaturish conception of neoclassicism so derided by advocates of behavioral or evolutionary economics Because he approaches his topic from the viewpoint of the philosophy of science Ross devotes one chapter to the philosophical theory and terminology on which his argument depends and another to related philosophical issues Two chapters provide the theoretical background in economics one covering developments in neoclassical microeconomics and the other treating behavioral and experimental economics and evolutionary game theory The three chapters at the heart of the argument then apply theses from the philosophy of cognitive science to foundational problems for economic theory In these chapters economists will find a genuinely new way of thinking about the implications of cognitive science for economics and cognitive scientists will find in economic behavior a new testing site for the explanations of cognitive science *Book News* ,1893 The Bookseller and the Stationery Trades' Journal ,1892 Official organ of the book trade of the United Kingdom **The London Medical Record** ,1884 **The Academy** ,1887 **A Genealogy of Self-Interest in Economics** Susumu Egashira,Masanori Taishido,D. Wade Hands,Uskali Mäki,2021-01-29 This is the first book to describe the entire developmental history of the human aspects of economics The issue of self interest is discussed throughout from pre Adam Smith to contemporary neuroeconomics representing a unique contribution to economics Though the notion of self interest has been interpreted in several ways by various schools of economics and economists since Smith first placed it at the heart of the field this is the first book to focus on this important but overlooked topic Traditionally economic theory has presupposed that the core of human behavior is self interest Nevertheless some economists e g recent behavioral economists have cast doubt on this self interested explanation Further though many economists have agreed on the central role of self interest in economic behavior each economist s positioning of self interest in economic theory differs to some degree This book helps to elucidate the position of self interest in economic theory Given its focus it is a must read companion not only on the history of economic thought but also on economic theory Furthermore as today s capitalism is increasingly causing people to wonder just where self interest lies it also appeals to general readers **Social Memory and Contemporaneity** Gul'nara Abduvasitovna Bakieva,2007 Introduction to social mnemology the scientific base The ontology of human memory The semantics of social memory The cognitive aspect of social memory The praxiological aspect of social memory Social memory as communication Social memory as a factor of modernization
