Crowdsourcing for Innovation in Higher Education Regina Lenart-Gansiniec,Łukasz Sułkowski,2022-11-11

Significant disruption to the educational sector occurred due to the COVID 19 pandemic This shed a light on the need for new delivery methods and greater collaboration which has become urgent and obvious as existing structures and traditional channels have struggled to cope or shut down Higher education institutions often fail to crowdsource successfully because

crowds differ in how they are organized compared to traditional sourcing. Instead of managing higher education institutions work with external contributors who self select into the process. Crowdsourcing has significant potential to transform the education space by enhancing existing methodologies and offering innovative possibilities to develop new pedagogical techniques. This offers benefits for practitioners, institutions, students and participants. Drawing on theory and best practice illustrated with a wide range of the examples and cases, Crowdsourcing for Innovation in Higher Education offers invaluable guidance and will be of interest to researchers, academics, policymakers and students in the fields of higher education development studies, organizational studies, management science and knowledge management. Toward Super-Creativity Sílvia Manuel Brito, 2020-01-29. What is super creativity? From the simple creation of a meal to the most sophisticated artificial intelligence system, the human brain is capable of responding to the most diverse challenges and problems in increasingly creative and innovative ways. This book is an attempt to define super creativity by examining creativity in humans, machines and human machine interactions. Organized into three sections, the volume covers such topics as increasing personal creativity, the impact of artificial intelligence and digital devices and the interaction of humans and machines in fields such as healthcare and economics. **ISCONTOUR 2013** Roman Egger, Christian Maurer, 2013. This are the proceedings of ISCONTOUR 2013, the first International Student Conference in Tourism Research which was held at the Salzburg University of Applied Sciences on the 15th of April 2013. **Crowdsourcing: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources, 2019-05-03. With the growth of information technology many new communication channels and platforms have emerged. This growth has advanced the work of crowdsourcing allowing individuals and companies in various industries to coordinate efforts on different levels and in different areas. Providing new and unique sources of knowledge outside organizations enables innovation and shapes competitive advantage. Crowdsourcing: Concepts, Methodologies, Tools and Applications is a collection of innovative research on the methods and applications of crowdsourcing in business operations and management science, healthcare, education and politics. Highlighting a range of topics such as crowd computing, macrotasking and observational crowdsourcing, this multi volume book is ideally designed for business executives, professionals, policymakers, academicians and researchers interested in all aspects of crowdsourcing.
