Routledge Handbook of Archaeology and Globalization Tamar Hodos, 2016-11-18 This unique collection applies globalization concepts to the discipline of archaeology using a wide range of global case studies from a group of international

specialists The volume spans from as early as 10 000 cal BP to the modern era analysing the relationship between material culture complex connectivities between communities and groups and cultural change Each contributor considers globalization ideas explicitly to explore the socio cultural connectivities of the past In considering social practices shared between different historic groups and also the expression of their respective identities the papers in this volume illustrate the potential of globalization thinking to bridge the local and global in material culture analysis The Routledge Handbook of Archaeology and Globalization is the first such volume to take a world archaeology approach on a multi period basis in order to bring together the scope of evidence for the significance of material culture in the processes of globalization This work thus also provides a means to understand how material culture can be used to assess the impact of global engagement in our contemporary world As such it will appeal to archaeologists and historians as well as social science researchers interested in the origins of globalization

Rethinking South China Sea Disputes Katherine Tseng,2016-12-08 The proposed book draws on the on going South China Sea dispute and the multifaceted challenges wrought by the South China Sea issue that requires an inter disciplinary perspective It employs legal analytical methods to emphasize the nuances of the role and interpretation of international law and treaties by China in different periods while taking into account policy and strategic concerns which generally cast great sways in decision making The re introduction of interdisciplinary concerns straddling law and history illustrates that the historical dimension which has long been neglected is an emerging concern that poses looming dangers that may unexpectedly radicalize the friction Contributing to debunking the mystique wrought by confrontations between a historical and a law dominated perspective these perspectives are supported by a more nuanced analytical framework featuring theoretical concerns with a tinge of practicality The South China Sea Dispute aims to unveil a nuanced evolution of the issue with a confluence of inter temporal law policy and maritime practices in the South China Sea

regarded as holding the intellectual property rights for some forms of ICH and this also posed problems in the implementation of the laws to protect the communities ICH This book employs a community based perspective and adopts a multidisciplinary approach in exploring questions of the rights to and benefits of heritage This book will be useful for students academics and policy makers with an interest in international law heritage and intellectual property rights

Imagined Geographies Geoffrey C. Gunn, 2021-09-03 *Imagined Geographies* is a pioneering work in the study of history and geography of the pre 1800 world In this book Gunn argues that different regions astride the maritime silk roads were not only interconnected but can also be construed as imagined geographies Taking a grand civilizational perspective five such geographic imaginaries are examined across respective chapters namely Indian Arabic Chinese Japanese and European including an imagined Great South Land Drawing upon an array of marine and other archaeological examples the author offers compelling evidence of the intertwining of political cultural and economic regions across the sea silk roads from ancient times until the seventeenth century Through a thorough analysis of these five geographic imaginaries the author sets aside purely national history and looks at the maritime realm from a broader spatial perspective He challenges the Eurocentric concept of center and periphery and establishes a revisionist view on a decentered world regional history This book will definitely interest history lovers from all around the world who wants to know more about how their forebears viewed their respective region and how their region fits into world history with local uniqueness Gunn takes large themes and makes them understandable He is not afraid to make the grand statement and to look at the sweep of history all in one arc I admire that greatly this is not history for the faint of heart But it is history well done and history that can show the forest from the trees Eric Tagliacozzo John Stambaugh Professor of History Cornell University This is one of the most ambitious and insightful books that I have read on pre Modern maritime Asia The author offers fascinating perspectives on how this vast region was imagined charted and experienced over many centuries That requires mastery of an immense range of scholarship and primary sources His aim is to knit this watery world together into a conceptual whole This mission is accomplished with style and discipline Andrew R Wilson John A van Beuren Chair of Asia Pacific Studies U S Naval War
