

Choose an XS. For excess performance and power you can depend on.

innovation! That's the Mercury spirit for '95. And you need? Then Mercury is ready for you. With three special engines. One a high-performance model and two for sport boats, runabouts or week-enders.

Now you can buy one of three engines and gear up to high-performance boating. Consider a few of the vital facts and features. Compatible with PowerTrim, Autolube™, remote controls for starting these outboard engines on 90° rotations. The water pickup has been lowered on the redesigned gear case housing so that engines will be "protected" on the bottom for high rpm turning. Here's time to see your Mercury dealer.

MERC 650XS—The developed 616 three-cylinder cylinder to meet the growing demands of our high-performance engine customers. Mercury 616 has longer compression chambers and Power-Force pistons assure increased

engine efficiency at or near maximum rpm. Soft-smearing, non-stick varnish for the 2000 provides a better seal for each cylinder.

For increased power and fuel economy Mercury's a dual-stage exhaust system. The exhaust ports, located with a new quarter-inch exhaust tube in the drive shaft housing, "breathe" the engine and increase efficiency.

You get the very latest Mercury engineering innovations, 90° design, four-valve, supercharging, ThruShaft gear and Power-Trim, high, lower gear positions and PowerTrim remote control with auto shift only.

MERC 850XS—If you're a sport boat, weekend or seasonal boater who wants more speed and power, you'll find it a plenty in the new 850XS. We've taken an amazingly fast 850XS 4-cylinder and infused it with power-boosting improvements. Higher rpm and the challenge. Mercury engineers found the

key. So, if you're looking for additional mph from your sport runabout or week-end, your Mercury dealer has the answer. When you're at it, get extra on performance boosting PowerTrim for changing engine angle and lowering speed with a pushbutton.

MERC 1500XS—Innovative powerhead engineering is what Mercury engineers used to build the already high performance characteristics of the engine even higher. That was a combination of 90° rotation. Plus, it added to the new four-cylinder 1500XS Power-Force pistons which increase compression without increasing cylinder size. Fuel engine breathing was improved by a combination of direct charge induction and lowered bowl. Intake/exhaust is greatly reduced, so even though piston bowl, get additional fuel and a smoother ride when you pedal up your PowerTrim.
