Gilgamesh to Gierach James W. White,2024-08-02 Fish have figured profoundly in both human history and imagination for millennia They are both gifts of the sea drawing civilizations to the water and terrors of the deep holding revelations of the unconscious and the unknown Today fly fishing attracts millions looking to escape modern life and reconnect with some primal meditative instinct to partake in nature s offerings *Gilgamesh to Gierach* is a collection of three hundred fishing water and fish tales spanning four millennia and numerous genres More than a historical overview White has distilled this immense topic into threads that flow through time from legends and literature to nursery rhymes poems and humorous fish tales Anglers will discover fly fishing s ancient roots and spiritual seekers the fish s religious and existential implications Among the included voices are Homer St John Ovid Brendan the Navigator Dame Juliana Berners Shakespeare Walton Melville Yeats Thoreau Hemingway Rodrick Haig Brown and Norman Maclean Whether told in full or more often condensed these stories will leave the reader with a strong sense of the fish s significance to many of the world s greatest thinkers Brimming with jokes histories simple folk tales and great tragedies this impressive work offers something for everyone **Literature and Ecotheology** George B. Handley,2024-07-22 *Literature and Ecotheology From Chaos to Cosmos* challenges us in a time of climate crisis to find more common ground between the dual projects of ecocriticism and ecotheology This book argues that in our postsecular age literature has become an important repository of theological wisdom that can like formal work in ecotheology provide the moral grounds for environmental care However for any cosmological understanding to be adequate to the challenges before us it must be responsive to the often painful contingencies and uncertainties that inhere in the

cosmos something that both ecocriticism and ecotheology have often neglected After a treatment of the ecocritical and ecotheological questions that pertain to the religious secular divide the study then turns to four contemporary American writers Annie Dillard Cormac McCarthy Marilynne Robinson and David James Duncan as examples Each uses the contingency of literary form and its promise of wholeness in order to imagine reasons for hope in light of the unpredictability and untold human and more than human suffering that lie at the heart of nature The book will be of interest to students scholars and researchers interested in ecotheology religious studies environmental literature the environmental humanities and environmental studies more broadly It offers a needed paradigm shift in how Western societies have tended to misuse both secularity and religion

Meeting,2002 **Rounding the Bases** Joseph L. Price,2006 After identifying early conflicts between churches and baseball in the late nineteenth century Price examines the appropriation of baseball by the House of David an early twentieth century millennial Protestant community in southern Michigan Turning then from historic intersections between baseball and religion two chapters focus on the ways that baseball reelects religious myths First the omphalos myth about

the origin and ordering of the world is reflected in the rituals and rules of the game Then the myth of curses is explored in the culture of superstition that underlies the game At the heart of the book is a sustained argument about how baseball functions as an American civil religion affirming and sanctifying American identity especially during periods of national crises such as wars and terrorist attacks Building on this analysis of baseball as an America s civil religion two chapters draw upon novels by W P Kinsella and David James Duncan to explore the sacramental potential of baseball and to align baseball with apocalyptic possibilities The final chapter serves as a full confession interpreting baseball affiliation stories as conversion narratives In various ways
