

WHERE ARE THE MOST INTENSE THUNDERSTORMS ON EARTH?

BY E. J. ZIPSER, DANIEL J. CECIL, CHUNTAO LIU,
STEPHEN W. NESBITT, AND DAVID P. YORTY

A satellite mission aimed at rainfall measurements has also provided unparalleled information on the global distribution of intense convective storms.

The Tropical Rainfall Measuring Mission (TRMM) satellite was launched in late 1997 with its primary focus being rainfall estimation. While it was originally an experimental mission with a 3–5-yr expected lifetime, ►

A 10 Year Climatology Of Amazonian Rainfall Derived From Passive Microwave Satellite Observations:

A 10-Year Climatology of Amazonian Rainfall Derived from Passive Microwave Satellite Observations Andrew J. Negri, Nasa Technical Reports Server (Ntrs), Et Al, 2013-08 In this study we present and describe a satellite derived precipitation climatology over northern South America using a passive microwave technique the Goddard Profiling Algorithm A period of data slightly longer than 10 years is examined The climatologies take the form of the mean estimated adjusted rainfall for a 10 year period with sub divisions by month and meteorological season For the six year period 1992 1997 when two satellites were in operation diurnal variability to the extent it is discerned by four unequally spaced observations is presented We find an alternating pattern of morning and maxima stretching from the northeast Atlantic coast clear across the continent to the Pacific The effects of topography coastlines and geography river valleys on the rainfall patterns are clear Interannual variability is examined by computing the deviations of yearly and warm season DJF rainfall from their respective long term means Interannual variability of the diurnal nature of the rainfall is presented and the strong El Nino event of 1997 1998 is discussed Amazonia and Global Change Michael Keller, Mercedes Bustamante, John Gash, Pedro Silva Dias, 2013-05-02 Published by the American Geophysical Union as part of the Geophysical Monograph Series Volume 186 Amazonia and Global Change synthesizes results of the Large Scale Biosphere Atmosphere Experiment in Amazonia LBA for scientists and students of Earth system science and global environmental change LBA led by Brazil asks how Amazonia currently functions in the global climate and biogeochemical systems and how the functioning of Amazonia will respond to the combined pressures of climate and land use change such as Wet season and dry season aerosol concentrations and their effects on diffuse radiation and photosynthesis Increasing greenhouse gas concentration deforestation widespread biomass burning and changes in the Amazonian water cycle Drought effects and simulated drought through rainfall exclusion experiments The net flux of carbon between Amazonia and the atmosphere Floodplains as an important regulator of the basin carbon balance including serving as a major source of methane to the troposphere The impact of the likely increased profitability of cattle ranching The book will serve a broad community of scientists and policy makers interested in global change and environmental issues with high quality scientific syntheses accessible to nonspecialists in a wide community of social scientists ecologists atmospheric chemists climatologists and hydrologists *Estimating Precipitation Over the Amazon Basin from Satellite and In-situ Measurements* Michelle L. Synoptic and Dynamic Climatology Roger G. Barry, Andrew M. Carleton, 2013-03-07 Synoptic and Dynamic Climatology provides the first comprehensive account of the dynamical behaviour and mechanisms of the global climate system and its components together with a modern survey of synoptic scale weather systems in the tropics and extratropics and of the methods and applications of synoptic climate classification It is unrivalled in the scope and detail of its contents The work is thoroughly up to date with extensive bibliographies by chapter It is illustrated with nearly 300 figures and plates Part 1 provides an introduction to the global climate system and the space time scales of weather and climate processes followed by a chapter on climate data and their analysis Part 2 describes and explains the characteristics of the general circulation of the global atmosphere and includes the nature and causes of global teleconnection patterns Part 3 discusses synoptic weather systems in the extratropics and tropics and satellite based climatologies of synoptic features It

also describes the applications of synoptic climatology and summarises current climatic research and its directions

Climatic Change and Global Warming of Inland Waters Charles R. Goldman, Michio Kumagai, Richard D.

Robarts, 2012-11-20 Effects of global warming on the physical chemical ecological structure and function and biodiversity of freshwater ecosystems are not well understood and there are many opinions on how to adapt aquatic environments to global warming in order to minimize the negative effects of climate change Climatic Change and Global Warming of Inland Waters presents a synthesis of the latest research on a whole range of inland water habitats lakes running water wetlands and offers novel and timely suggestions for future research monitoring and adaptation strategies A global approach offered in this book encompasses systems from the arctic to the Antarctic including warm water systems in the tropics and subtropics and presents a unique and useful source for all those looking for contemporary case studies and presentation of the latest research findings and discussion of mitigation and adaptation throughout the world Edited by three of the leading limnologists in the field this book represents the latest developments with a focus not only on the impact of climate change on freshwater ecosystems but also offers a framework and suggestions for future management strategies and how these can be implemented in the future Limnologists Climate change biologists fresh water ecologists palaeoclimatologists and students taking relevant courses within the earth and environmental sciences will find this book invaluable The book will also be of interest to planners catchment managers and engineers looking for solutions to broader environmental problems but who need to consider freshwater ecology

Studies Of Cloud, Convection And Precipitation Processes Using Satellite Observations William B Rossow, George Tselioudis, Zhengzhao Johnny Luo, 2022-10-26 Clouds convection and precipitation processes are central components of Earth's weather and climate They are produced by atmospheric motions across a very wide range of space time scales from local weather to long term global climate variation They feedback on these motions by perturbing the heating cooling that drive the atmospheric circulation These processes also perturb the oceanic circulation and land surface properties that affect the atmospheric circulation Because of the coupling of the atmosphere ocean land system across all scales by cloud convection and precipitation processes studying their behaviors requires measurements in space time variations across all these scales simultaneously Satellite constellations with global coverage and high time resolution offer the ideal platforms for such observations This book summarizes some of the latest research using combinations of various satellite observations to study these processes and to evaluate their representations in global weather and climate models Included with this publication are downloadable electronic slides and accompanying notes of each lecture for students teachers and public speakers around the world to be better able to understand cloud convection and precipitation processes

Passive Microwave Remote Sensing of Land-Atmosphere Interactions 0

Pampaloni, Choudhury, Kerr, Njoku, 2023-05-31 Recent advances in theory and observations using passive microwave remote sensing have highlighted the potential of spaceborne sensors for contributing to the required land surface measurements of

soils vegetation snow cover and precipitation Furthermore the spatial resolution of passive microwave observations matches the special scales of large scale models of land atmosphere interactions both for data assimilation and validation In order to stimulate and focus this research a workshop sponsored by ESA and NASA was organized to review the state of the art in microwave radiometry related to land applications and to exchange ideas leading into new directions for future research This volume contains the refereed papers from the aforementioned ESA NASA workshop which are arranged by topic as well as the edited working group reports
