When Texas Prison Scams Religion Michael G. Maness, 2023-05-22

When Texas Prison Scams Religion exposes corruption in the Texas Department of Criminal Justice especially in the abuse of religion In many ways this book is a literature review of 1 800 plus works that defends freedom of conscience in prison while exposing the unconstitutionality of the seminary program that buys faith with favor from prisoners The state veritably ordains the prisoner a Field Minister that represents the offices of the Governor TDCJ Director and wardens throughout the prison Therein TDCJ lies about neutrality in a program all about Christian missions and lies again in falsely certifying elementary Bible students as counselors Why is the director sponsoring psychopaths counseling psychopaths In fact TDCJ pays 314 million a year to UTMB for psychiatric care and receives not a single report of the care given and worse for UTMB generates no reports itself The underbelly TDCJ s executive culture of cover up is exposed TDCJ has hired the lowest qualified of the applicant pool many times in the last 25 years and regularly destroys statistics on violence TDCJ Dir Collier led the prison to model Louisiana Warden Burl Cain the most scandal ridden in penal history according to a host of published news stories for 20 years Therein Collier led TDCJ to favor the smallest segment of religious society within Evangelical Dominionism Texas has no business endorsing the truth of any religion over another We close with a proposal that utilizes the 400 000 000 hours of officer contact over ten years as a definitive influence in contrast to a commissioner that spends less than 10 minutes on each decision Maness has been lobbying Austin for 15 years to definitively access staff for his 100 000 Mothers 1% Certainty Parole Texas Constitutional Amendment which would

National Library Service Cumulative Book Review Index, 1905-1974: Titles. [A-Z National Library Service Corporation,1975 *Clinical Foundations of Musculoskeletal Medicine* Robert J. Esther,2021-07-22 Musculoskeletal MSK disorders have a high prevalence and are one of the main reasons for patients to consult with a provider For a range of issues from injury to back pain to rheumatic disease musculoskeletal pathology is the second most common reason for a patient to see a primary care provider However despite their prevalence and significant socioeconomic impact musculoskeletal disorders are relatively undertaught in medical schools in the United States While all medical nursing and physician assistant students receive exposure to some MSK content in many medical schools this material does not receive curricular exposure commensurate with its prevalence This practical textbook fills in that gap All aspects of musculoskeletal disease and its management are presented concisely for quick reference and review with each chapter opening with clear goals and objectives The text begins with a discussion of the anatomy and physiology of bone cartilage and muscle including imaging techniques and interpretation Musculoskeletal infections tumors and vascular conditions are then covered along with common rheumatic conditions such as rheumatoid and osteoarthritis metabolic bone disease and age specific and traumatic conditions Finally the upper and lower extremity and spine are thoroughly discussed in terms of anatomy pathoanatomy common clinical conditions physical exam and common radiographic and clinical correlations The main audience for *Clinical Foundations of Musculoskeletal Medicine* is medical students seeking to improve their understanding of common musculoskeletal conditions Given the relevance of musculoskeletal conditions to a range of providers this book can also be used for the musculoskeletal education of allied professionals such as physician assistants PA and nurse practitioner students It could likewise serve as a resource for practicing medical professionals to develop and enhance their knowledge in this content area *The Remittance Landscape* Sarah Lynn Lopez,2015-01-12 Crossing anthropology with urban studies and architecture this is the first book to explore how Mexican migrants are building houses and other structures in Mexico with the money they earn in the US The author defines this as the development of remittance space a phenomenon that is changing the landscapes and economies of villages and

towns throughout Mexico and not incidentally of several US cities as well including LA and Chicago. While remittance building is not unique to Mexico, the remittance corridor from the US to our southern neighbor is the largest in the world: a flow of about 22 billion dollars in 2010 alone. Lopez has identified a correspondence between this monetary flow and the construction boom in rural Mexico. In fact, she proposes that a Mexican's capacity to build in rural villages itself motivates migration and changes social and cultural life for migrants and their families. Through careful ethnographic and architectural analysis, Lopez brings migrant hometowns to life and positions them in larger critical debates about migration. The research was conducted on both sides of the border: Lopez worked and lived with migrants in Los Angeles and Chicago, and she pursued her subject throughout the south of Jalisco, not far from Guadalajara. This is a dangerous area; drug wars are raging, and it takes courage and care to spend time there, a matter covered in the book.
