Optimizing the Nation's Investment in Academic Research National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Higher Education and Workforce, Committee on Science, Technology, and Law, Committee on Federal Research Regulations and Reporting Requirements: A New Framework for Research Universities in the 21st Century, 2016-07-29

Research universities are critical contributors to our national research enterprise. They are the principal source of a world class labor force and fundamental discoveries that enhance our lives and the lives of others around the world. These institutions help to create an educated citizenry capable of making informed and crucial choices as participants in a democratic society. However, many are concerned that the unintended cumulative effect of federal regulations undercuts the productivity of the research enterprise and diminishes the return on the federal investment in research.

Optimizing the Nation's Investment in Academic Research reviews the regulatory framework as it currently exists, considers specific regulations that have placed undue and often unanticipated burdens on the research enterprise, and reassesses the process by which these regulations are created, reviewed, and retired. This review is critical to strengthen the partnership between the federal government and research institutions to maximize the creation of new knowledge and products to provide for the effective training and education of the next generation of scholars and workers and to optimize the return on the federal investment in research for the benefit of the American people.
