African Mathematics From Bones To Computers:

African Mathematics Abdul Karim Bangura, 2011-02-16 This is the first comprehensive text on African Mathematics that can be used to address some of the problematic issues in this area. These issues include attitudes, curriculum development, educational change, academic achievement, standardized and other tests, performance factors, student characteristics, cross-cultural differences, and studies in literacy, native speakers, social class, and differences in equal education. Teaching methods, knowledge level, educational guidelines and policies, transitional schools, comparative education, other subjects such as physics and social studies, surveys, talent, educational research, teacher education and qualifications, academic standards, teacher effectiveness, lesson plans and modules, teacher characteristics, instructional materials, program effectiveness, program evaluation, African culture, African history, Black studies, class activities, educational games, number systems, cognitive ability, foreign influence, and fundamental concepts. What unifies the chapters in this book can appear rather banal, but many mathematical insights are so obvious and so fundamental that they are difficult to absorb, appreciate, and express with fresh clarity. Some of the more basic insights are isolated by accounts of investigators who have earned their contemporaries' respect. Winner of the 2012 Cecil B. Currey Book Award. **African Mathematics** Mamokgethi Setati, 2010

Mathematical Ideas Abdul Karim Bangura, 2020-06-02 This book by renowned scholar Dr. Abdul Karim Bangura combines linguistics and mathematics to show how and why African-centred mathematical ideas can be a driving force in Africa's development efforts. Bangura explores the concept that Africa has been the centre of the History of Mathematics for thousands of years, as the civilizations that emerged across the continent developed contributions which would enrich both ancient and modern understanding of nature through mathematics. However, scholars and other professionals working in the

field of mathematics education in Africa have identified a plethora of issues in carrying out their tasks This is highlighted by one of the most compelling arguments in the book which is that a major reason for these problems is the fact that the African mother tongues has been greatly neglected in the teaching of mathematics in the continent Bangura asserts that a change has to be made in order for Africa to benefit from the exceptional opportunities mathematics offer showing that even if there is a great body of work connecting linguistics and mathematics few analyses have been performed on the link between African languages and mathematics and the ones that have been made are not theoretically grounded on linguistics Thus the book begins by identifying the objects of study of linguistics and mathematics and delineates which ones they have in common Next since the object of study of linguistics is language the nine design features of language are employed to examine each of the objects as it pertains to African languages After that mathematical ideas of sustainability and those of tipping points are suggested as means to help Africa's development efforts

Great Books Written by Africans across the Academic Disciplines Emmanuel D. Babatunde, Abdul Karim Bangura, 2022-07-04 This volume is the first text to provide a comprehensive account of the great books across the academic disciplines written by Africans born in the continent and those who became naturalized citizens of African countries These great books are those that have had a powerful important or affecting influence on the author of a chapter in this book as an individual and on society The books included here are mostly of the storytelling type and thus not representative of most of the academic disciplines This volume allows each contributor to write a chapter on a discipline showcasing five great books written by African authors Each selection is appraised and suggestions made by other experts in a discipline while every chapter entails an introduction to the topic a conceptual discussion of the discipline a book by book review of the five books and a conclusion and recommendations for research using the selected books

Digital Communications at

Crossroads in Africa Kehbuma Langmia, Agnes Lucy Lando, 2020-04-27 Digital communication as it is practiced in Africa today is at a crossroad This edited collection takes that crossroad as its starting point as it both examines the complicated present and looks to the uncertain future of African communication systems Contributing authors explore how western digital communication systems have proliferated in the African communication landscape and argue that rich and long cherished African forms of communal in person communication have been increasingly abandoned in favor of assimilation to western digital norms As a result future generations of Africans born on the continent and abroad may never recognize and appreciate African systems of communications Acknowledging that globalized digital communication systems are here to stay the volume contends that in order to comprehend the past present and future of African communications scholars need to decolonize their approach to teaching and consuming mediated and in person communications on the African continent and abroad

Bullying Leah P. Hollis, 2022-06-15 Black Women Intersectionality and Workplace Bullying extends and enriches the current literature on workplace bullying by examining specifically how work abuse disproportionality hurts women of color affecting their mental health negatively and hence their career progression In this interdisciplinary text Hollis combines the fields of intersectionality and workplace bullying to present a balanced offering of conceptual essays and empirical research studies The chapters explore how researchers have previously used empirical studies to address race and gender before arguing that the more complex an identity or intersectional position such as being a Black gender fluid woman the more likely a person shall experience workplace bullying The author also looks at how this affects Black women's mental health such as through increased anxiety depression insomnia and self medicating behaviors before looking specifically at Black female athletes as a study the topic of colorism at work and its impact on Black women and how workplace bullying compromises organizations diversity and inclusion initiatives This book will be of immense interest to graduate students and academics in the fields of social work ethnic studies Black studies Africana studies gender studies political science sociology psychology and social justice It will also be of interest to those interested in intersectionality and how this relates to race and gender of women

W.E.B. Du Bois and the Africana Rhetoric of Dealienation Monique Leslie Akassi, 2018-11-02 As the rich words from the African proverbs resonate into the twenty first century regarding the importance of identity and telling the stories of people of African descent through the eyes of the people the grand rhetorician and griot of the twentieth century Dr William

Edward Burghardt Du Bois's infamous problem remains so today the problem of the colour line After the election of Barack Hussein Obama the first African American president of the United States after the Civil Rights Movement after Brown versus the Board of Education after the students right to their own language after Plessy versus Ferguson and the murders of innocent young African American males including Emmett Till Timothy Thomas Trayvon Martin John Crawford III Tamir Rice Jordan Davis Eric Garner and Mike Brown people of African descent are still battling with being labelled a problem in one's own country while the USA continues to strive for a post racial era W E B Du Bois's rhetoric and motives in general are more relevant today than ever in reassessing what he so eloquently describes and unveils through the phrase double consciousness in Souls of Black Folk 1903 through which he reveals the feeling of a problem This ground breaking volume featuring contributions from W E B Du Bois's great grandson Arthur McFarlane II among others is organized into three parts Part I focuses on the foundation of Du Bois's Africana Rhetoric through the origins of Africana Studies Pan Africanism and Africana Critical Theory Part II focuses on Du Bois's rhetorical strategies and rhetorical analyses in his scholarship and life Part III focuses on gender and sexuality in Du Bois's selected works This work the first of its kind devoted exclusively to Du Bois's rhetoric and motives can serve as a blueprint for today as the struggle toward a post racial society continues

Theories of Knowing and Knowledge Production Kofi Kissi Dompere, 2024-09-26 The book is devoted to exploring the organizational dimensions of the general space of problem solution dualities within epistemic fields to examine the diversity and unity of knowing and information knowledge production in science and non science and how to account for and explain the forces of variety transformations as induced by decision choice actions in creating the functor space and the space of categorial converters as well as to integrate decision choice qualities of curiosity creativity hope despair success failure and their relationships with epistemic anomalies in the production of intellectual investment flows and capital stocks and the rise and fall of institutions in response to the dynamics of the open space of problem solution dualities with open algorithms under the principle of non satiation The conditions and sources of uncertainties in human actions are traced through the space of ontic epistemic dualities as generated by cognitive capacity limitations leading to the concepts of imagination possibility and probability with corresponding worlds and then link to the discussions on thinking reasoning processes with goals objectives and visions of education in social set ups The concepts and phenomena of anticipation necessity expectation freedom anomaly curiosity creativity hope despair success and failure contained in the space of imaginations are defined under the concepts of onticity and epistemicity where their roles in the dualistic polar journeys are discussed analyzed and connected to epistemic transversality conditions under the principle of opposites relative to the conditions of input output and cost benefit dualities The book is to fill in some of the important phenomena needed in my investigation of theory of knowing as a production of intellectual investment flows and information knowledge accumulation as the production of intellectual capital stocks relative to the disequilibrium dynamics of human intellectual heritage based on fuzzy paradigm of thought thus

providing an added foundation in integrating subjective elements into the development of open artificial intelligence where cost benefit values operate to determine varieties over the spaces of true false and yes no dualities in machine learning

Theory of Philosophical Consciencism Dompere, Kofi Kissi, 2017-09-24 In the Theory of Philosophical Consciencism Professor Dompere establishes how Nkrumah used the theory of categorical conversion housing the necessary conditions of transformation to design strategies for creating the sufficient conditions for socio political transformations The theory of Philosophical Consciencism is about the institutionally destruction creation process for socio political transformation The theory shows the scientific contributions of Nkrumah s thinking to the solution of the transformation problem in science and its application to social systemicity where Nkrumah s analytical weapons were drawn from African conceptual system The theory is developed as logico mathematical foundations that guide the internal management of the command control decision choice systems for creative destruction of socio political varieties in transformations through the development of qualitative mathematics making possible the construct of qualitative equations of motion for connecting varieties in qualitative transfers The qualitative equations of motion through the Philosophical Consciencism constitute the sufficient conditions for transformations The theory links rationality intentionality experiential information structure defective deceptive information structures in the control dynamic games of power and dominance by the duals and poles under the principle of opposites with relational continua and unity relative to decision choice systems that induce negation negation transformations where paths are established by the history of success failure outcomes in the socially control dynamic zero sum games between the duals in any duality and between the poles of any actual potential polarity The main premise of the monograph is that there exists a set of sufficient conditions in support of the necessary conditions for internal transformation of socio natural varieties The theory is useful in understanding developmental processes and multi polar power zero sum games for global dominance The necessary conditions constitute the natural necessity that constrains cognitive freedom The sufficient conditions constitute cognitive freedom that must overcome the necessity in socio natural systems dynamics Had this conceptual system been familiar to African leaders the African transformation from colonialism to complete emancipation rather than neocolonialism would have been increasingly successful This holds for those seeking triumph over injustices oppression imperialism and social change in all systems

Culpability of the Trans-Atlantic Slave Trade Abdul Karim Bangura, 2016-12-07 This book contributes to the debate over the culpability of the Trans Atlantic Slave from various disciplinary perspectives The general thesis that undergirds the book is that by knowing who was predisposed to benefit the most from the trade and why prompting them to initiate it appropriate culpability can be assigned This approach also allowed for a more in depth analysis of the issue from many disciplines making it the first of its kind For the sake of cohesion and coherence some of the major questions addressed by every chapter are quite similar albeit authors were encouraged to fine tune and add to these questions to meet their disciplinary requirements By emphasizing the why in some of the questions a qualitative explanatory case study approach was utilized Both primary and secondary data sources were also used for each chapter to offer a cogent analysis and new information on the topic

The Theory of Categorical Conversion Dompere, Kofi Kissi, 2017-09-17 The Theory of Categorical Conversion is advanced by Professor Kofi Kissi Dompere as mathematical philosophical and game theoretic foundations to solve the problem of socio natural transformation as governed by some internal process in relation to Marx Schumpeter and Nkrumah Dompere s methodology is based on the Africentric principles of opposites made up of actual potential polarity negative positive duality with relational continuum and unity under cost benefit rationality and Asantrofi Anoma principle supported by fuzzy paradigm of thought Socio natural transformations are seen in terms of game theories in a fuzzy stochastic space admitting of defective deceptive information structures in quality quantity space within the subjective objective duality The main premise of the monograph is that there exists a set of necessary and sufficient conditions for internal self transformation The necessary conditions are made up of categorical moments and categorical transfer functions forming the domain of control instrumentation in creating the sufficient conditions for categorical conversion processes Dompere presents an important methodological framework for the study and construction of the theories of socioeconomic development and political change as well as info dynamics connecting knowledge sciences innovation and engineering to the space of knowing under qualitative quantitative transformational dynamics with defective deceptive information structures in the games for power and dominance by duals and poles in conflicts The necessary conditions of socio natural transformation are internally derived based on the relational structure of matter energy information activities within the dynamics of qualitative dispositions of dualities of actual potential polarities The theory consists of category formation showing ontological epistemological categories and categorical dynamics shows elemental conversions of categorical varieties in a continuum The logical tools and the paradigm of thought for the theoretical development of Nkrumah s framework involve self excitement self correction and self control systems induced by internal contradictions The set of necessary conditions constitutes the natural necessity that constrains cognitive freedom in socio natural transformations Had this conceptual system been familiar to economists and social scientists the construct of the theories of socioeconomic development and

Branches of Asanteism Abdul Karim Bangura, 2019-10-03

Branches of Asanteism explores the epistemologies and research methodologies that have sprung from Mwalimu Molefi Kete Asante's treatises on Afrocentricity. The book identifies and analyzes thirteen such epistemologies and methodologies while defining and explicating the various branches of Asante's idea of Afrocentricity. *Pan-African Futurism* Reginold A.

Royston, 2025-10-21 Ghana has been a crucial site of encounters between the West and Africa and a historic center for twentieth century Pan African independence movements. Today it has also emerged as an important node of technology driven development in the Global South. Ghana's activist software developers and digital diaspora are redefining the role of technology not simply as a means for economic growth but as a tool for greater African political autonomy. In this rich ethnography Reginold A. Royston uses the term Pan African futurism to describe the redemptive ethos among technologists working on development projects on the ground in Africa today. Royston charts the explosion of mobile Internet access on the African continent, growing interest in African tech entrepreneurship and the flowering of digital transnational ties. Ghana's Pan African futurists advocate entrepreneurship and civil society activism as a means of hacking the kinds of socioeconomic development that have long been advocated by NGOs. Using participant observation and interviews with tech developers on the ground and media producers in the diaspora including in virtual spaces and with communities online, Royston provides a nuanced portrait of tech users focused on social good emanating from the Global South, expanding the discourse for contemporary Pan African politics.
