The Law of Cryonics Pierre de Gioia Carabellese,Camilla Della Giustina,2024-03-19 This book through the lens of interdisciplinary legal analysis draws a subtle balance between bioethics and financial regulation with the latter playing an unexpectedly crucial role in the way life may potentially be governed The legal topic of human preservation or cryoconservation was initially developed in the United States in the case of Donaldson v van de Kamp More recently the subject arose in Europe as a result of a decision of the High Court Family Division London This new theme of cryoconservation has unfolded through multifaceted forms including its impact on regulation In an area that may at least prima facie be regarded as belonging to the traditional realm of medical law the findings presented here suggest that its potential has strong economic implications The work argues that it is necessary also to look at this subject from a more interdisciplinary perspective drawing a fil rouge between two otherwise seemingly opposing areas of law medical law and financial regulation The legal framework draws on the Anglo American and the United Kingdom in particular along with civil law analysis from Italy The work will be of interest to researchers and academics in the areas of medical law legal philosophy financial law property law and insurance law

Considerations on the AI Endgame Soenke Ziesche,Roman V. Yampolskiy,2025-03-20 This seminal volume offers an interdisciplinary exploration into the rapidly evolving field of artificial intelligence and its societal implications Written by leading scholars Soenke Ziesche and Roman V Yampolskiy the book delves into a multitude of topics that address the rapid technological advancements in AI and the ethical dilemmas that arise as a result The topics explored range from an in depth look at AI welfare science and policy frameworks to the mathematical underpinnings of machine intelligence These subjects include discussions on preserving our personal identity in technological contexts as well as on the question of AI identity innovative proposals towards the critical AI value alignment problem and a call to merge Western and non Western approaches towards universal AI ethics The work also introduces unconventional yet crucial angles such as the concept of ikigai in AI ethics and a pioneering attempt to map a potential AI driven ikigai universe as well as the role of design formalisation or Designometry in the creation of artefacts By offering a balanced mix of theoretical and applied insights the book serves as an invaluable resource for researchers policymakers and anyone interested in the future of AI and the extent of its impact on society

Future T/Issues Ruth Gehrmann,2024-07-01 Transplant practices are discussed in the medical realm in fictional texts and in popular advertisement Yet how do these sectors intersect and influence each other How can the accounts of surgeons invested in transplant practice be brought into conversation with fictional voices Future T Issues positions transplantation at the intersection of natural science and the humanities and adds to the discussion of organ transplantation by focusing on one specific aspect that is commonly overlooked the idea of speculation By engaging with speculative fiction in conversation with life writing it contributes to a more thorough understanding of transplantation as a cultural practice showcasing that transplantation is imagined as part of the future both within and beyond the literary sphere Hereby this book establishes the relationship between literary and medical narratives as reciprocal in effect eroding boundaries between the life sciences and literary studies As an interdisciplinary endeavor this study contributes to literary studies specifically to the fields of life writing speculative fiction and young adult fiction it offers insights for the study of transplantation in the popular realm and adds to the medical humanities

Artificial Superintelligence Roman V. Yampolskiy,Allison Duettmann,2020-04-30 Attention in the AI safety community has increasingly started to include strategic

considerations of coordination between relevant actors in the field of AI and AI safety in addition to the steadily growing work on the technical considerations of building safe AI systems This shift has several reasons Multiplier effects pragmatism and urgency Given the benefits of coordination between those working towards safe superintelligence this book surveys promising research in this emerging field regarding AI safety On a meta level the hope is that this book can serve as a map to inform those working in the field of AI coordination about other promising efforts While this book focuses on AI safety coordination coordination is important to most other known existential risks e g biotechnology risks and future human made existential risks Thus while most coordination strategies in this book are specific to superintelligence we hope that some insights yield collateral benefits for the reduction of other existential risks by creating an overall civilizational framework that increases robustness resiliency and antifragility
