Linking Integration and Residential Segregation Gideon Bolt, A. Sule Özüekren, Deborah Phillips, 2013-09-13 Policy makers tend to view the residential segregation of minority ethnic groups in a negative light as it is seen as an obstacle to their integration In the literature on neighbourhood effects the residential concentration of minorities is seen as a major impediment to their social mobility and acculturation while the literature on residential segregation emphasises the opposite causal direction by focusing on the effect of integration on levels of de segregation This volume however indicates that the link between integration and segregation is much less straightforward than is often depicted in academic literature and policy discourses Based on research in a wide variety of western countries it can be concluded that the process of assimilation into the housing market is highly complex and differs between and within ethnic groups The integration pathway not only depends on the characteristics of migrants themselves but also on the reactions of the institutions and the population of the receiving society Linking Integration and Residential Segregation exposes the link between integration and segregation as a two way relationship involving the minority ethnic groups and the host society highlighting the importance of historical and geographical context for social and spatial outcomes This book was originally published as a special issue of the Journal of Ethnic and Migration Studies

Selling EthniCity Olaf Kaltmeier, 2016-04-01 Bringing together a multidisciplinary team of scholars this book explores the importance of ethnicity and cultural economy in the post Fordist city in the Americas It argues that cultural political and economic elites make use of cultural and ethnic elements in city planning and architecture in order to construct a unique image of a particular city and demonstrates how the use of ethnicized cultural production such as urban branding based on local identities by the economic elite raises issues of considerable concern in terms of local identities as it deploys a practical logic of capital exchange that can overcome forms of cultural resistance and strengthen the hegemonic colonization of everyday life At the same time it shows how ethnic communities are

able to use ethnic labelling of cultural production ethnic economy or ethno tourism facilities in order to change living conditions and to empower its members in ways previously impossible Of wide ranging interest across academic disciplines this book will be a useful contribution to Inter American studies **Superdiversity** Steven Vertovec,2022-11-15

Superdiversity explores processes of diversification and the complex emergent social configurations that now supersede prior forms of diversity in societies around the world Migration plays a key role in these processes bringing changes not just in social cultural religious and linguistic phenomena but also in the ways that these phenomena combine with others like gender age and legal status The concept of superdiversity has been adopted by scholars across the social sciences in order to address a variety of forms modes and outcomes of diversification Central to this field is the relationship between social categorization and social organization including stratification and inequality Increasingly complex categories of social difference have significant impacts across scales from entire societies to individual identities While diversification is often met with simplifying stereotypes threat narratives and expressions of antagonism superdiversity encourages a perspective on difference as comprising multiple social processes flexible collective meanings and overlapping personal and group identities A superdiversity approach encourages the re evaluation and recognition of social categories as multidimensional unfixed and porous as opposed to views based on hardened one dimensional thinking about groups Diversification and increasing social complexity are bound to continue if not intensify in light of climate change This will have profound impacts on the nature of global migration social relations and inequalities Superdiversity presents a convincing case for recognizing new social formations created by changing migration patterns and calls for a re thinking of public policy and social scientific approaches to social difference This introduction to the multidisciplinary concept of superdiversity will be of considerable interest to students and researchers in a range of fields in the humanities and social sciences The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license Space, the City and Social Theory Fran Tonkiss,2005 Taking a thematic approach this book covers the main aspects of modern urban life taught on undergraduate courses The key approaches to the city within contemporary social theory are assessed Tonkiss adopts an international perspective with examples drawn from places such as New York Paris and Sydney
