A Scattered Wind The Hinterland:

Technical Report ES. ,1966 **Technical Report** ,1963 Scientific and Technical Aerospace Reports ,1984 *Fire in Tropical Forests and Grasslands* Robert B. Batchelder,Howard Franklin Hirt,1966 **Restoration of Coastal Dunes** Luisa M Martínez,Juan B. Gallego-Fernández,Patrick A. Hesp,2013-01-30 The continuously growing human population along the world s coasts will exacerbate the impact of human activities on all coastal environments Restoration activities will therefore become increasingly important In particular sandy shores and coastal dunes will require significant restoration efforts because they are preferred sites for human settlement industrial and urban development and tourism With this book experts in the field present a comprehensive review of restoration studies and activities where successful and failed studies or approaches from around the world are contrasted and compared A major asset the book provides is a compendium of studies showing that coastal dune restoration has many definitions and thus leads to many different actions This volume addresses those with an interest in conservation ecology and biology coastal dune dynamics and geomorphology and coastal management who are seeking information on the different strategies for coastal dune restoration applied in different regions of the world Finally it will be a valuable resource for coastal scientists and planners as well as for local and state officials residents of coastal communities environmental advocates and developers **Environmental Design of Urban Buildings** Mat Santamouris,2013-06-17 This book provides a review of environmental and energy research with respect to urban building projects It describes how to overcome related challenges in environmental design of urban buildings The book discusses the passive and active environmental systems within building concepts **Marine Permian of England** D.B. Smith,2013-03-07 This book is concerned almost wholly with a diverse suite of carbonate rocks that were formed near the margins of shallow tropical seas during the last 5 7 million years of the Permian period 300 251 Ma These unique rocks collectively known as the Magnesian Limestone have been studied for more than 160 years and the names of some of the early workers Geinitz Murchison Phillips Sedgwick Sorby would grace any geological hall of fame Despite this formidable assault and the efforts of a host of later workers the Magnesian Limestone still retains many of its secrets Permian marine rocks crop out on both sides of the Pennines but those of the Zechstein Sea to the east are by far the thicker and more varied and in these lie all but one of the sites selected for special protection Detailed accounts of the rocks in 26 such sites form about half of this book and the normal and special features of these sites are compared contrasted and placed in their mutual context in the remainder of the book The sites were selected according to a range of criteria including uniqueness representativeness historical importance and suitability for teaching purposes and research most are inland quarries but a few are in the unrivalled coastal cliffs of classical County Durham where the main difficulty lies in deciding what not to select **Islands Beyond the Horizon** Roger Lovegrove,2012-09-13 Islands have an irresistible attraction and an enduring appeal Naturalist Roger Lovegrove has visited many of the most remote islands in the world and in this book he takes the

reader to twenty that fascinate him the most Some are familiar but most are little known they range from the storm bound island of South Georgia and the ice locked Arctic island of Wrangel to the wind swept wave lashed Mykines and St Kilda The range is diverse and spectacular and whether distant offshore inhabited uninhabited tropical or polar each is a unique self contained habitat with a delicately balanced ecosystem and each has its own mystique and ineffable magnetism Central to each story is also the impact of human settlers Lovegrove recounts unforgettable tales of human endeavour tragedy and heroism But consistently he has to report on the mankind s negative impact on wildlife and habitats from the exploitation of birds for food to the elimination of native vegetation for crops By looking not only at the biodiversity of each island but also the uneasy relationship between its wildlife and the involvement of man he provides a richly detailed account of each island its diverse wildlife its human history and the efforts of conservationists to retain these irreplaceable sites **The Gayl**gre

Moose D. M. R. Bentley,1992 The Gay Grey Moose is a collection of essays presenting a comprehensive view of English poetry in Canada from the early colonial period to the Post Modern era From a wide range of poets this book provides fresh contexts for viewing and discussing three centuries of English Canadian poetry Both national and regional in its orientation it seeks to discover the relationship between poetry and landscape in a poetic continuity that stretches from the late 17th century to the present Published in English Forging a Multinational State John Deak,2015-09-23 The Habsburg Monarchy

ruled over approximately one third of Europe for almost 150 years Previous books on the Habsburg Empire emphasize its slow decline in the face of the growth of neighboring nation states John Deak instead argues that the state was not in eternal decline but actively sought not only to adapt but also to modernize and build Deak has spent years mastering the structure and practices of the Austrian public administration and has immersed himself in the minutiae of its codes reforms political maneuverings and culture He demonstrates how an early modern empire made up of disparate lands connected solely by the feudal ties of a ruling family was transformed into a relatively unitary modern semi centralized bureaucratic continental empire This process was only derailed by the state of emergency that accompanied the First World War Consequently Deak provides the reader with a new appreciation for the evolving architecture of one of Europe s Great Powers in the long nineteenth century

Amnesia Road Luke Stegemann,2021-03-01 At both ends of the world I have found confusion and profound disagreement about how to read the story of the past about who should write or speak it and what parts of it should be written or spoken about at all Amnesia Road is a compelling literary examination of historic violence in rural areas of Australia and Spain It is also an unashamed celebration of the beautiful landscapes where this violence has been carried out Travelling and writing across two locations the seldom visited mulga plains of south west Queensland and the backroads of rural Andalusia award winning Australian Hispanist Luke Stegemann uncovers neglected history and its many neglected victims and asks what place such forgotten people have in contemporary debates around history nationality guilt and identity This book will come to be regarded as a classic of Australian literature Nicolas Rothwell Daring and original an eloquent and

moving meditation on place memory and history Mark McKenna *Amnesia Road* swept me away in lyrical storytelling though veiled inside is a brutally complex shared history exposing the deliberate annihilation of the relationship between landscapes and their kin Stegemann has lifted the dark shadowy veil of this denial invisibility and silence to shift the direction of historical redemptive memory so the action of healing can begin Brook Andrew Luke Stegemann explores with extraordinary tenderness and understanding the aftermaths of the frontier massacres in Australia and the atrocities of civil war Spain He offers new insights about amnesia and the forgetting of the violent past and sets a roadmap to acknowledge and come to terms with the past A brilliant achievement Lyndall Ryan In this absorbing meditation on spectacular beauty and unfathomable cruelty Luke Stegemann seamlessly joins his passionate love of two soils Queensland in Australia and Andalusia in Spain *Amnesia Road* displays that combination of warm empathy and cool appraisal essential in the best kind of history Frank Bongiorno By turns beautiful and shocking Stegemann's book reflects with a coolly objective emotionally spare voice on the murderous pasts of Andalusia and south west Queensland *Amnesia Road* probes with sharp intelligence what history looks like when it can't be remembered and what it means to remember the otherwise forgotten dead Francis O Gorman Saintsbury Professor of English Literature University of Edinburgh

Environmental Histories of the Dinaric Karst Borna Fuerst-Bjeliš, Jelena Mrgić, Hrvoje Petrić, Matija Zorn, Žiga Zwitter, 2024-08-30 This multi and interdisciplinary book will offer novel environmental history EH research on Dinaric Karst one of European largest continuous karstic areas from prehistory to contemporary history Various methodological approaches will be applied e.g. archival investigations oral history interviews field work and laboratory analyses Historical human adaptations to karstic environmental conditions human interventions in environment environmental dynamics and impacts of environmental change will be dealt with by focusing on historical uses of natural resources their further ecological implications e.g. fire hazard and their change over time on natural and social impacts of changes in weather and climate on pollution and on intellectual EH General characteristics and local peculiarities will be identified based on comparisons with foreign literature Primary audience are historians geographers archaeologists anthropologists ethnologists foresters and landscape architects Chapters 1 5 12 and 16 are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com

Introduction to Coastal Processes and Geomorphology Robin Davidson-Arnott, Bernard Bauer, Chris Houser, 2019-09-19 Grounded in current research this second edition has been thoroughly updated featuring new topics global examples and online material Written for students studying coastal geomorphology this is the complete guide to the processes at work on our coastlines and the features we see in coastal systems across the world **Ecological Engineering** Hein van Bohemen, 2005 Journal of the Royal Society of Western Australia, 1987 Sedimentation and Tectonics in Rift Basins Red Sea:- Gulf of Aden B.H. Purser, D.W. Bosence, 2012-12-06 *Sedimentation and Tectonics in Rift Basins Red Sea Gulf of Aden* presents new case studies and synthesises the results of recent research on the sedimentological evolution of the Red

Sea Gulf of Aden rift system This rift basin is generally regarded as the best natural geological laboratory in the world in which to study the processes of rift formation Uplift of the rift margins in an arid climate results in extensive three dimensional exposures of pre and syn rift strata and associated structures These serve as analogues for the understanding and hydrocarbon exploration of deeper buried rift systems on continental margins such as the North Sea and the Atlantic margins The Red Sea Gulf of Aden rift is also exceptional in that its stratigraphy spans all stages from pre rift environments syn rift continental to marine environments through the rift to drift transition to post rift sea floor spreading The work is arranged in eight sections following a review of the sedimentology and stratigraphy of rift basins the magmatism and structural evolution of the Red Sea Gulf of Aden rift is reviewed Subsequently new case studies are presented of the early rifting environment syn rift sedimentation tectonics and diagenesis evaporites and salt tectonics Post rift sediments of the axial trough are then discussed along with studies of reefs coastal zone and shelf sediments and the tectonic geomorphology of the rift margin escarpment This work results from extensive new research in the rift basin largely carried out under collaborative research projects by European and Middle Eastern geologists It will be an invaluable reference work for geoscientists in the hydrocarbon groundwater and mineral extraction industries as well as for researchers in university departments of earth sciences mining and physical geography

A World that was Ronald Murray Berndt, Catherine Helen Berndt, John E. Stanton, 1993 This extraordinary book written from material gathered over half a century ago will almost certainly be the last fine grained account of traditional Aboriginal life in settled south eastern Australia It recreates the world of the Yaraldi group of the Kukabrak or Narrinyeri people of the Lower Murray and Lakes region of South Australia In 1939 Albert Karloan a Yaraldi man urged a young ethnologist Ronald Berndt to set up camp at Murray Bridge and to record the story of his people Karloan and Pinkie Mack a Yaraldi woman possessed through personal experience not merely through hearsay an all but complete knowledge of traditional life They were virtually the last custodians of that knowledge and they felt the burden of their unique situation This book represents their concerted efforts to pass on the story to future generations For Ronald and Catherine Berndt this was their first fieldwork together in an illustrious joint career of almost fifty years During long periods principally until 1943 they laboured with pencil and paper to put it all down a far cry from the recording techniques of today s oral historians Their fieldnotes were worked into a rough draft of what would become but not until recently the finished manuscript The book s range is encyclopaedic and engrossing sometimes dramatic It encompasses relations between and among individuals and clan groups land tenure kinship the subsistence economy trade ceremony councils fighting and warfare rites of passage from conception to death myths and beliefs and practices concerning healing and the supernatural Not least it is a record of the dramatic changes following European colonization A World That Was is a unique contribution to Australia s cultural history There is simply no comparable body of work nor is there ever likely to be

Bedouin Ethnobotany James P. Mandaville, 2011-06-15 A Bedouin asking a fellow tribesman about grazing conditions in

other parts of the country says first simply Fih hayah or Is there life A desert Arab s knowledge of the sparse vegetation is tied directly to his life and livelihood Bedouin Ethnobotany offers the first detailed study of plant uses among the Najdi Arabic speaking tribal peoples of eastern Saudi Arabia It also makes a major contribution to the larger project of ethnobotany by describing aspects of a nomadic peoples conceptual relationships with the plants of their homeland The modern theoretical basis for studies of the folk classification and nomenclature of plants was developed from accounts of peoples who were small scale agriculturists and to a lesser extent hunter gatherers This book fills a major gap by extending such study into the world of the nomadic pastoralist and exploring the extent to which these patterns are valid for another major subsistence type James P Mandaville an Arabic speaker who lived in Saudi Arabia for many years focuses first on the role of plants in Bedouin life explaining their uses for livestock forage firewood medicinals food and dyestuffs and examining other practical purposes He then explicates the conceptual and linguistic aspects of his subject applying the theory developed by Brent Berlin and others to a previously unstudied population Mandaville also looks at the long history of Bedouin plant nomenclature finding that very little has changed among the names and classifications in nearly eleven centuries This volume includes a CD ROM featuring more than 340 color images of the people the terrain and nearly all of the plants mentioned in the text as well as an audio file of a traditional Bedouin song and its translation and analysis An essential volume for anyone interested in the interaction between human culture and plant life Bedouin Ethnobotany will stand as a definitive source for years to come
