William Henry Pick, Great Britain. Meteorological Office, 1926 **A Short Course in Elementary Meteorology (Classic Reprint)** W. H. Pick, 2018-03-19 Excerpt from A Short Course in Elementary Meteorology The British Empire has produced some of the world's foremost meteorologists Halley Beaufort Abercromby Blanford Eliot and Shaw to mention only a few but until recently no one but a few specialists thought it worth his while to make a serious study of meteorology But things have now changed for the war taught us the importance of meteorology in practical life and the aviator has arrived with his active life in the region of nature which we meteorologists have only looked into from below Meteorology from being the hobby of a few and the life's work of a still smaller number of despised official weather prophets has come into its own and not only the aviator but the general public is asking for the means to study this neglected branch of science It is therefore with the greatest pleasure that I welcome this little book and trust that it is only the first of a long series for meteorology is still in its infancy and as it develops text books must be rewritten or they will become worse than useless About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

A Short Course in Elementary Meteorology William Henry Pick, Great Britain. Meteorological Office, 1942 **A Short Course in Elementary Meteorology** W. H. Pick, 2015-06-25 Excerpt from A Short Course in Elementary Meteorology This unimposing little book is a remarkable one for it marks an epoch there are numerous books on elementary meteorology but this is the first which has been written by a British teacher for a class of students who are learning meteorology as a qualification for their profession The British Empire has produced some of the world's foremost meteorologists Halley Beaufort Abercromby Blanford Eliot and Shaw to mention only a few but until recently no one but a few specialists thought it worth his while to make a serious study of meteorology But things have now changed for the war taught us the importance of meteorology in practical life and the aviator has arrived with his active life in the region of nature which we meteorologists have only looked into from below Meteorology from being the hobby of a few and the life's work of a still smaller number of despised official weather prophets has come into its own and not only the aviator but the general public is asking for the means to study this neglected branch of science It is therefore with the greatest pleasure that I welcome this little book and trust that it is only the first of a long series for meteorology is still in its infancy and as it develops text books must be rewritten or they will become worse than useless This book has been written by a practical meteorologist for practical

aviators and by a teacher for his students This is an ideal combination and the product is not disappointing I wish however to warn the student that there are many unsolved problems in meteorology and therefore he should not be satisfied with any explanation or theory which the book contains He has been given the best explanations which it is possible to give in the present state of our knowledge limited in some cases by the need to use elementary considerations only All this should however give him a greater interest in his work for it will afford him plenty of opportunities to use his own brains to say nothing of the possibility of his making an important discovery What more could any real student desire About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
