Rogers, Benjamin Eldon Stevens, 2015 For all its concern with change in the present and future science fiction is deeply rooted in the past and surprisingly engages especially deeply with the ancient world Indeed both as an area in which the meaning of classics is actively transformed and as an open ended set of texts whose own classic status is a matter of ongoing debate science fiction reveals much about the roles played by ancient classics in modern times Classical Traditions in Science

Fiction is the first collection in English dedicated to the study of science fiction as a site of classical receptions offering a much needed mapping of that important cultural and intellectual terrain This volume discusses a wide variety of representative examples from both classical antiquity and the past four hundred years of science fiction beginning with science fiction's rosy fingered dawn and moving toward the other worldly literature of the present day As it makes its way through the eras of science fiction Classical Traditions in Science Fiction exposes the many levels on which science fiction engages the ideas of the ancient world from minute matters of language and structure to the larger thematic and philosophical concerns

Carl Uhlir, Christian Rollinger and Christine Walde's *Classics and Comics* expands classical reception studies by publishing original scholarship free of charge and by reflecting on Greco Roman antiquity as present phenomenon and diachronic culture that is part of today's transcultural and highly diverse world. Antiquity in our understanding does not merely belong to the past but is always experienced and engaged in the present. *Classics and Comics* contributes to the critical review on methods, theories, approaches and subjects in classical scholarship which currently seems to be awkwardly divided between traditional perspectives and cultural turns. *Classics and Comics* brings together scholars, writers, essayists, artists and all kinds of agents in the culture industry to get a better understanding of how antiquity constitutes a part of today's culture and transforms our present. *Classics and Comics* appears twice yearly and publishes regular issues as well as specially themed and guest edited issues focused on individual subjects and questions. Call for papers are released regularly and long in advance on our homepage <https://www.classicsandcomics.org/> and on other pages that feature announcements for classical studies. The Visual Language of Comics
Neil Cohn, 2013-12-05. Drawings and sequential images are an integral part of human expression, dating back at least as far as cave paintings, and in contemporary society appear most prominently in comics. Despite this fundamental part of human identity, little work has explored the comprehension and cognitive underpinnings of visual narratives until now. This work presents a provocative theory that drawings and sequential images are structured the same as language. Building on contemporary theories from linguistics and cognitive psychology, it argues that comics are written in a visual language of sequential images that combines with text. Like spoken and signed languages, visual narratives use a lexicon of systematic patterns stored in memory, strategies for combining these patterns into meaningful units, and a hierarchic grammar governing the combination of sequential images into coherent expressions. Filled with examples and illustrations, this book details each of these levels of structure, explains how cross-cultural differences arise in diverse visual languages of the world, and describes what the newest neuroscience research reveals about the brain's comprehension of visual narratives. From this emerges the foundation for a new line of research within the linguistic and cognitive sciences, raising intriguing questions about the connections between language and the diversity of human expressive behaviours in the mind and brain.
