Studies in Art Education, 1994 **The Journal of Aesthetic Education**, 1992 Includes special issues **The Philosophical Foundations of Soviet Aesthetics** Edward M. Swiderski, 2012-12-06 0 1 GENERAL DESCRIPTION OF THE PROBLEMATIC This study is devoted to an examination of a concept of crucial significance for Soviet aesthetics the concept of the aesthetic esteticeskoe Soviet aestheticians have for some time already been trying to design a concept of the aesthetic that would satisfy on the one hand the requirements of aesthetic phenomena and on the other hand the principles of the Marxist Leninist world view The first part of this work shows how the concept of the aesthetic has been and continues to be problematic for Soviet aestheticians This task is carried out by dwelling first of all on the controversies among Soviet aestheticians concerning meta aesthetic issues viz the nature and scope of aesthetics as well as its place among other philosophical and non philosophical disciplines A particularly clear view of the problems that have traditionally pre occupied Soviet aestheticians is provided by an examination of what they standardly call the method of aesthetics where method is understood in the sense of an explanatory framework rather than in the strict logico scientific sense of the term This discussion will provide the occasion to pass in review the main periods of Soviet aesthetics and the characteristic aspects of each The chapter on the sources of contemporary Marxist Leninist aesthetics brings into relief the lack of a homogeneous tradition in the question of the nature of the aesthetic and other related problems **Aesthetics, Issues and Inquiry** E. Louis Lankford, 1992 A handbook for educators wishing to incorporate aesthetics in their art programs a comprehensive look at what aesthetics is to a brief view of human development in relation to art learning to a complete system for introducing aesthetics to students and moving them progressively toward more complex forms of aesthetic inquiry [Http www.naea-reston.org/publications/list.html](http://www.naea-reston.org/publications/list.html) **Landscape between Ideology and the Aesthetic** Andrew Hemingway, 2016-11-28 At a time of growing interest in relations between Marxism and Romanticism Andrew Hemingway's essays on British art and art theory reopen the question of Romantic painting's ideological functions and in some cases its critical purchase Half the volume exposes the voices of competing class interests in aesthetics and art theory in the tumultuous years of British history between the American Revolution and the 1832 Parliamentary Reform Act Half offers new perspectives on works by some of the most important landscape painters of the time John Constable J M W Turner John Crome and John Sell Cotman Four essays are hitherto unpublished and the remainder have been updated and in several cases substantially rewritten for this volume **An Enquiry Into the Nature of Aesthetic Form** Ved Prakash Sharma, 1961 *Aesthetics and the Embodied Mind: Beyond Art Theory and the Cartesian Mind-Body Dichotomy* Alfonsina Scarinzi, 2014-11-24 The project of naturalizing human consciousness experience has made great technical strides e.g. in mapping areas of brain activity but has been hampered in many cases by its uncritical reliance on a dualistic Cartesian paradigm though as some of the authors in the collection point out assumptions drawn from Plato and from Kant also play a role The present volume proposes a version of

naturalism in aesthetics drawn from American pragmatism above all from Dewey but also from James and Peirce one primed from the start to see human beings not only as embodied but as inseparable from the environment they interact with and provides a forum for authors from diverse disciplines to address specific scientific and philosophical issues within the anti dualistic framework considering aesthetic experience as a process of embodied meaning making Cross disciplinary contributions come from leading researchers including Mark Johnson Jim Garrison Daniel D Hutto John T Haworth Luca F Ticini Beatriz Calvo Merino The volume covers pragmatist aesthetics neuroaesthetics enactive cognitive science literary studies psychology of aesthetics art and design sociology

Bodily Sensibility Jay Schulkin, 2004-04-08 Although we usually identify our abilities to reason to adapt to situations and to solve problems with the mind recent research has shown that we should not in fact detach these abilities from the body This work provides an integrative framework for understanding how these abilities are affected by visceral reactions Schulkin presents provocative neuroscientific research demonstrating that thought is not on one side and bodily sensibility on the other from a biological point of view they are integrated Schulkin further argues that this integration has important implications for judgements about art and music moral sensibilities attraction and revulsion and our perpetual inclination to explain ourselves and our surroundings New Thoughts on Translation Jun Xu, 2024-10-31 This book represents the cutting edge ideas on translation studies in recent years from China's pioneer translator Xu Jun The book discusses the following points first of all the theoretical thinking of translation studies second the translation methods and challenges in the new era and then the translation spirit and critical exploration followed by translation education translation value and others It serves as a reference book for scholars and readers who are dedicated in thoughts about developing China's translation studies

A Systems Approach to Social and Organizational Planning Gerrit Van Wyk, 2003 A Systems Approach to Social And Organizational Planning is about systems thinking and its application in health care Health care systems all over the world are on the verge of breakdown and neither patients nor governments and businesses can afford health care delivery as we know it any longer The problem is that planners still conceptualize enormously complex biological and social systems in a simplistic manner An analysis of the problem indicates that the solution lies in using a holistic approach such as the systems approach to re conceptualize our thinking about the problem situation The result is a systems view of health which has profound implications for planning and change management in health care It is a fresh and different approach to an intractable problem and therefore deserves the attention of both systems thinkers and health care planners The purpose of the text is to introduce readers to the systems approach and to contribute towards the current debate about health care planning The target audience is therefore students new to systems thinking and specifically health care planners Publisher

The Entanglement Alva Noë, 2023-06-27 Why human nature is an aesthetic phenomenon and why we need art and philosophy to understand ourselves In The Entanglement philosopher Alva No explores the inseparability of life art and philosophy arguing that we have greatly

underestimated what this entangled reality means for understanding human nature Life supplies art with its raw materials but art No argues remakes life by giving us resources to live differently Our lives are permeated with the aesthetic Indeed human nature is an aesthetic phenomenon and art our most direct and authentic way of engaging the aesthetic is the truest way of understanding ourselves All this suggests that human nature is not a natural phenomenon Neither biology cognitive science nor AI can tell a complete story of us and we can no more pin ourselves down than we can fix or settle on the meaning of an artwork Even more art and philosophy are the means to set ourselves free at least to some degree from convention habit technology culture and even biology In making these provocative claims No explores examples of entanglement in artworks and seeing writing and speech and choreography and dancing and examines a range of scientific efforts to explain the human Challenging the notions that art is a mere cultural curiosity and that philosophy has been outmoded by science The Entanglement offers a new way of thinking about human nature the limits of natural science in understanding the human and the essential role of art and philosophy in trying to know ourselves Handbook of Phenomenological Aesthetics Hans Rainer Sepp, Lester Embree, 2010-03-11 Historically phenomenology began in Edmund Husserl's theory of mathematics and logic went on to focus for him on transcendental first philosophy and for others on metaphysics philosophical anthropology and theory of interpretation The continuing focus has thus been on knowledge and being But if one began without those interests and with an understanding of the phenomenological style of approach one might well see that art and aesthetics make up the most natural field to be approached phenomenologically Contributions to this field have continually been made in the phenomenological tradition from very early on but so to speak along the side The situation has been similar with phenomenological ethics A great deal of thought about art and aesthetics has nevertheless accumulated during a century and a handbook like the present one is long overdue The project of this handbook began in conversations over dinner in Sepp's apartment in Baden Baden at one evening of the hot European summer in the year 2003 As things worked out he knew more about whom to ask and how much space to allocate to each entry and Embree knew more about how to conduct the inviting preliminary editing and prodding of contributors who were late returning their criticized drafts and copyedited entries and was able to invest the time and other resources from his endowed chair That process took longer than anticipated and there were additional unfortunate delays due to factors beyond the editors's control

Kierkegaard, Aesthetics, and Selfhood Peder Jothen, 2016-04-22 In the digital world Kierkegaard's thought is valuable in thinking about aesthetics as a component of human development both including but moving beyond the religious context as its primary center of meaning Seeing human formation as interrelated with aesthetics makes art a vital dimension of human existence Contributing to the debate about Kierkegaard's conception of the aesthetic Kierkegaard Aesthetics and Selfhood argues that Kierkegaard's primary concern is to provocatively explore how a self becomes Christian with aesthetics being a vital dimension for such self formation At a broader level Peder Jothen also focuses on the role authority and meaning of

aesthetic expression within religious thought generally and Christianity in particular

Aesthetics, Problems in the Philosophy of Criticism Monroe C. Beardsley, 1981-01-01 This second edition features a new 48 page Afterword 1980 updating Professor Beardsley's classic work

Aesthetics Carolyn Korsmeyer, 1998-11-09 Philosophers have considered questions raised by the nature of art of beauty and critical appreciation since ancient times and the discipline of aesthetics has a long tradition that stretches from Plato to the present
