choice of tires followed by discussion of brakes wheels and brake control systems Various landing gear architectures are investigated together with the details of shock absorber designs Retraction kinematics and mechanisms are studied as well as possible actuation approaches Detailed information on the various hydraulic and electric services commonly found on aircraft and system elements such as dressings lighting and steering are also reviewed Detail design points the process of analysis and a review of the relevant requirements and regulations round out the book content The Design of Aircraft Landing Gear is a landmark work in the industry and a must read for any engineer interested in updating specific skills and students preparing for an exciting career

Hendrix, 2004 This 6th edition continues to study examples of public relations by following the author's philosophy that great PR comes from the interactive participation among sources and receivers of information **26 Seconds** Rossana D'Antonio, 2025-05-13 Much as Eric Schollsberg's Fast Food Nation made people think about the way we eat this provocative memoir and expos challenges readers to question why given its long history of cover ups and systemic safety gaps we continue to trust the aviation industry On a stormy late May morning in 2008 TACA Airlines Flight 390 crashes at one of the most dangerous airports in the world Honduras's Toncontin International Airport Five people die in the crash among them Rossana D Antonio's brother pilot Cesare D Antonio Suspecting Cesare will be made a scapegoat for the accident as so often happens to pilots Rossana decides to leverage her decades of experience as an engineer and set out in search of the truth

Part memoir part expos 26 Seconds interweaves Rossana's research regarding other parallel accidents with her own story Six months after the TACA crash Captain Sully Sullenberger lands his plane on the Hudson River Although authorities call his landing a miracle they also blame him for its necessity One year after the TACA 390 tragedy Air France 447 falls from the sky Again pilot error As Rossana digs deeper she exposes a culture that is too quick to conclude pilot error and an industry that experiences systemic weaknesses chooses profits over safety lies to its customers and is willing to risk lives to get its planes back up in the sky Ultimately she uncovers the smoking gun she's been looking for revealing the truth about TACA 390 exposing aviation cover ups and challenging us all to question the very systems we've been told we can trust with our lives
