Kolie E. Crutcher, III, 2007-12-01 Probably the greatest tragedy of the human race is the failure of the overwhelming majority of people to realize their dreams Your dreams are realized as a result of creating power in your life But because most people have no clue about how to create power in their lives their dreams remain unrealized With that being said quite naturally the question becomes How do I create power in my life The answer to this question is found within the pages of this book Think about the following You cannot turn on the light in your home without electric power In the same fashion you cannot turn on the dreams in your life without personal power Electric Living The Powerful Life demonstrates the process of creating that personal power necessary to turn on the dreams in your life by relating it to the electric power necessary to turn on a common light bulb in your home That is my promise to you the reader This is NOT just another motivational book And here is why as you will learn motivation is only part of the formula for creating power If all you want is motivation there are countless other books that you can purchase Yes Electric Living The Powerful Life will motivate you but it does not stop there This book goes the extra mile and gives you a formula for creating power the personal power necessary to realize the dreams in your life

**African-Centred Management Education** David N. Abdulai,2016-04-01 In African Centred Management Education Professor Abdulai looks critically at the failings of management education in Africa and how that has impacted growth and development efforts especially at this critical stage in the continent s positive growth and development trajectory He concludes that Africa s current positive economic growth cannot be sustained without a significant contribution from its human capital He adds that the outstanding economic record of Asian economies in recent decades dramatically illustrates how important human capital is to growth These countries lacking natural resources and importing practically all their energy requirements have grown rapidly by relying on a well trained educated and conscientious workforce Professor Abdulai believes that Africa too can sustain its current growth and development by effectively combining its abundant natural resources with its human capital to attain its economic development but this will require an African cadre of well trained managers at the helm of both private and public sector institutions For this to become a reality management education in Africa will have to play a significant role but the author argues that it cannot be effective by continually mimicking the West in the programmes it delivers It must come up with innovative and relevant pedagogy that will address the special challenges that the continent faces and deliver an African centred management education As well as pointing to the failures of

management education in Africa Abdulai offers suggestions as to how to make management education really contribute to the education of Africans in order to sustain current and future development      *When the Lioness Roars...Again and Again*
