Innovation and Entrepreneurship John R. Bessant, Joe Tidd, 1991-01-08

Innovation and Entrepreneurship 3rd Edition is an accessible text on innovation and entrepreneurship aimed specifically at undergraduate students studying business and management studies but also those on engineering and science degrees with management courses. The text applies key theories and research on innovation and entrepreneurship and then reviews and synthesises those theories and research to apply them in a much broader and contemporary context including the corporate and public services emerging technologies and economies and sustainability and development and creating and capturing value from innovation and entrepreneurship. In this third edition the authors continue to adopt an explicit process model to help organise the material with clear links between innovation and entrepreneurship. This text has been designed to be fully integrated with the Innovation Portal at www.innovationportal.info which contains an extensive collection of additional resources for both lecturers and students including teaching resources, case studies, media clips, innovation tools, seminar and assessment activities and test questions.

Informal Learning Lloyd Davies, 2008. In much of the developed world learning is synonymous with the formal structured processes that involve teachers, lecturers or trainers. Yet it is experience that is by far the most influential teacher that any of us will have from the very first moment we are born. Lloyd Davies puts forward a new way of looking at experiential learning, a model that identifies the elements and points to some of the dynamics. The book highlights the characteristics that are common to the learning process, explains how we learn from experience and why each of us sees our experiences in different ways and consequently learns different lessons. It provides advice and guidance on how each of the various elements of the process can be used to greater effect both for individual and group learning as well as in mentoring and counselling. The book, which is based on the author's research, is written for a wide readership that includes both learning practitioners and students. If individuals and the organizations within which they work as students or as employees understand the basis on which they learn and can turn the process from a passive to an active one, the implications for their development are profound. Lloyd Davies' model for Informal Learning provides a relevant, flexible and significant tool that can offer a sea change in the way we all learn.
