Tea Historically tea has been assimilated in the social fabric for millenniums Serendipity has a great hand in the knowledge of tea like that of coffee Coffee was supposedly found by a shepherd who had seen his goats eating some berries off a bush and then acting in a very enthusiastic and frisky manner In the same way tea was supposedly discovered by a Chinese Emperor more than 3000 years ago He was sitting in his garden and a few leaves of a fragrant camellia bush accidentally fell into a cauldron of boiling water in the vicinity The resulting fragrance tempted the Emperor to sip this refreshing brew And soon everybody in China was steeping the leaves of the Camellia in hot water and drinking the resulting infusion down It was only later that the proper preparation of tea in the form of drying the leaves fermentation oxidization and other tea preparation methods before it was packaged and sold to the consumers became known globally down the ages The Camellia sinensis plant is normally used for the preparation of green tea The tea available in the market is normally found in 3 forms black tea green tea and oolong tea All these teas are made through different phases of drying and intensity of the fermentation process About 3 billion kgs of tea are consumed all over the world annually of which the major tea drinkers are the Chinese Japanese Indians which come up to 43% of the world population of tea drinkers In ancient Eastern medicine tea has been used as a relaxant and healing drink According to the Chinese drinking lots of tea meant that you would not suffer from stomach problems headaches nervous tension and any other disease of which you could think For the last 4000 years tea has been an important ingredient used to cure people in alternative medicines in the East

Grotesque Progeny Mark Heimermann, 2024-11-20 In contemporary Western society childhood appears more protected than ever to the casual onlooker Yet we are increasingly fascinated by narratives in which children are depicted as unsettling beings both dangerous and endangered sometimes chaotic or even evil In *Grotesque Progeny: The Commodification of Dangerous and Endangered Children* author Mark Heimermann argues that these representations reflect cultural anxiety regarding a shifting conception of youths from emotional assets to economic ones In the early to mid twentieth century children who had previously been viewed in part as economic investments were largely moved out of the work force For decades children were instead valued primarily as emotional assets However the rise of neoliberal capitalism in the 1970s and 1980s and its eventual proliferation throughout our politics and our lives has led to the widespread commodification of social arenas previously kept separate from the capitalist quest for profit Not even children have escaped being objectified and dehumanized in this manner Heimermann examines a variety of texts that center on children and adolescents who are marked as different from the adult characters and consequently viewed as grotesque Chapters cover Jeff Lemire s *Sweet Tooth* M R Carey s *The Girl with All the Gifts* Katherine Dunn s *Geek Love* Richard Starkings s *Elephantmen* Kazuo Ishiguro s *Never Let Me Go* and more Because the young characters are not viewed as equal members of society they must either strike back at those who commodify them or risk facing a lifetime of dehumanization *Grotesque Progeny* argues that these monstrous depictions reveal societal unease over shortsighted economic and political thinking the exploitation of children and the changing nature of childhood The book addresses a growing concern over which spaces ought to be excluded or removed from the harsh valuations of neoliberalism
