Animal Homes Raina Mooncrest, AI, 2025-03-06. Animal Homes explores the diverse and fascinating world of animal habitats, revealing how these spaces are not just shelters but extensions of the animals themselves. The book examines the ecological factors influencing habitat selection, from resource availability to predator avoidance. Did you know that underground burrows, like those of prairie dogs, regulate temperature, providing a stable environment? Or that the elaborate nests of some primates showcase advanced construction techniques? The book progresses logically, starting with fundamental concepts of habitat selection before branching into detailed explorations of specific environments, like underground burrows, arboreal nests, underwater dens, and mountain homes. Each section highlights the unique challenges and adaptations associated with each habitat, using case studies, comparative analyses, and insights from field research. This approach emphasizes the ingenuity and adaptability of animals, underlining the importance of habitat conservation for biodiversity and ultimately revealing how animal architecture reflects behavior, social structures, and evolutionary adaptations.

Inventory and Monitoring of Wildlife Habitat Allen Cooperrider, Raymond J. Boyd, Hanson R. Stuart, 1986. Spatial Observation of Giant Panda Habitat Xinyuan Wang, Jing Zhen, Qingkai Meng, 2023-05-08. This book evaluates the past, present, and future habitat suitability of giant pandas based on spatial observation technology involving optical remote sensing, microwave remote sensing, and LiDAR to discover the mysterious ecological environment of giant panda habitat. Considering the problems faced by the world natural heritage site protection, it takes the world natural heritage site Sichuan Giant Panda Sanctuaries, Wolong Mt. Siguniang, and Jiayin Mountains as the research area, exemplifies systematically the various techniques and methodologies of spatial information technology for monitoring, evaluation, and prediction of rare and endangered species habitats, and provides scientific suggestions for sustainable development of giant panda habitat based on a series of comprehensive case analysis at Wolong National Nature Reserve and Ya'an Prefecture, Sichuan Province, China. The book serves both as a textbook in the field of natural heritage protection, remote sensing, and GIS application as well as a reference for managing natural heritage sites.
