The Engineers' Manual (Classic Reprint) Ralph G. Hudson, 2017-07-11 Excerpt from The Engineers Manual This work originated from the conception that the practicing engineer or engineering student would welcome a consolidation of the formulas and constants for which he is accustomed to Search through several volumes and that the application Of each formula might be explained more concisely than in texts devoted exclusively to the process Of derivation With this end in view those engineering formulas mathematical operations and tables Of constants which appear to be most useful are presented in systematic order and in a Size of book designed to fit the pocket Each formula is preceded by a statement in which its appli cation the symbology Of the involved physical quantities and definite units of measurement are indicated It is believed that this method Of presentation increases the speed of selection and

understanding of a desired formula and insures greater accuracy Of substitution Since data units of any kind may be converted into specified units by reference to the table of conversion factors The sequence Of the formulas is based generally upon their order Of derivation so that the understanding of a formula may be enlarged by inspection of the formulas which precede it All catchwords symbols and formulas are printed in full face type and each formula or group of formulas is numbered to facilitate reference to the text or cross reference between formulas About the PublisherForgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.comThis book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
