The Fundamentals of Animation Paul Wells, 2006-06 *The Fundamentals of Animation* by Paul Wells offers an illustrated and visually stimulating introduction to the key elements of animation. It discusses the key principles and processes involved in animation exploring the entirety of the creative process from finding and researching a concept through the preparation and techniques used to the execution of the work. Each stage is presented in an engaging visual style accompanied by examples and analysis of contemporary student and commercial animation. The book also discusses the links between animation and the styles and narratives of other areas of popular culture aligning theory and ideas to practical advice. It includes a section for aspiring animators examining career paths, portfolios and the structure of the creative industries

Animation Paul Wells, 2019-07-25 *Animation: Genre and Authorship* explores the distinctive language of animation, its production processes and the particular questions about who makes it, under what conditions and with what purpose. In this first study to look specifically at the ways in which animation displays unique models of auteurism and how it revises generic categories, Paul Wells challenges the prominence of live action filmmaking as the first form of contemporary cinema and visual culture. The book also includes interviews with Ray Harryhausen and Caroline Leaf and a full timeline of the history of animation

Animation between Magic, Miracles and Mechanics Hans Henrik Lohfert Jørgensen, Laura Katrine Skinnebach, Henning Laugerud, 2023-08-18 When it comes to images, we are all animists. Deep down, we all know that images can at least potentially be alive or come to life. Nowadays, we may tend to rationalize our ingrained animism and explain it away as a mere projection, only happening in the space between image and viewer. In the Middle Ages, however, imagery made enthusiastic use of magical, miraculous and mechanical means of animation, empowered and ensouled by both natural and supernatural principles of life. This animist book investigates magic, miracles and mechanics as motors of animation and seeks to understand the living image in solidarity with medieval experience rather than dismissive alienation of it. Effigies did bleed, weep or lactate either through divine intervention or through hydraulic machinery. Statues did move or speak either as demonic oracles or as talking heads with implanted speaking tubes. Marvels made by magic or by miracles were real as real as the wonders of physical mechanics moving bodily matter. We just need to look and listen more carefully to comprehend these fluid realities, even when especially when they challenge our received worldview. Animation was by no means uncontested or uncontradicted, but even its stiffest critics knew that gods and demons could intervene in inanimate matter to set it in motion, to speak in tongues and exude the liquids of life

Cartoonists and animators have given animals human characteristics for so long that audiences are now accustomed to seeing Bugs Bunny singing opera and Mickey Mouse walking his dog Pluto The Animated Bestiary critically evaluates the depiction of animals in cartoons and animation more generally Paul Wells argues that artists use animals to engage with issues that would be more difficult to address directly because of political religious or social taboos Consequently and principally through anthropomorphism animation uses animals to play out a performance of gender sex and sexuality racial and national traits and shifting identity often challenging how we think about ourselves Wells draws on a wide range of examples from the original King Kong to Nick Park s Chicken Run to Disney cartoons such as Tarzan The Jungle Book and Brother Bear to reflect on people by looking at the ways in which they respond to animals in cartoons and films
