Building Services Procurement

Christopher Marsh,2003-09-02 Procurers and contractors increasingly need practical guidance for the strategic procurement of building services Clients seeking to improve the delivery performance of the construction industry are increasingly using alternative procurement arrangements These modern arrangements attempt to deliver a more strategic approach to achieving value for money Yet little thought is ever given to the strategic importance of building services No other single aspect of a project will affect project success more than the timely delivery of a fully functioning services installation Beyond the normal considerations of time cost and quality building services have a series of unique requirements not normally considered For the first time these unique requirements are combined in a single text providing the reader with the definitive guide to building services procurement The text reviews each of the major critical success factors and clearly explains the supporting processes that must be enacted to ensure success It reviews the general nature of procurement systems and construction projects and then explores the increasing importance that building services play both in the construction process and in determining success for the client Each significant stage within the procurement process is explored by explaining its importance and showing what decisions need to be made to develop a cohesive strategy It concludes by giving a step by step guide to clearly develop and implement a building services procurement strategy

Added Value in Design and Construction Allan Ashworth,Keith Hogg,2014-07-30 Added Value in Design and Construction takes a holistic student centred approach to offering public and private sector clients the ultimate reward doing more for less The Latham Report was a call to action and this book provides students of construction with the theoretical and practical knowledge to deliver the recommendations of the report It describes the principles and techniques crucial to adding value and reducing costs in design and construction in the twenty first century This book examines in detail a wide range of strategies that can be

applied during the design and construction process to add value and bring the best interests of the client sharply into focus

Strategic Integrated Program Delivery Mark Betts, Peter E.D. Love, Derek H.T. Walker, 2024-12-04 This book outlines a cutting edge form of program delivery which the authors term SIP Form or Strategic Integrated Program delivery Using the Melbourne Level Crossing Removal Program LXRPP consisting of the removal of 85 dangerous level crossings throughout metropolitan Melbourne including rail station upgrades signalling and track work and other associated capital works as an exemplar the book sets out four features that the authors argue define the SIP form concept as follows The organisation delivers a program of projects many using an IPD contract variant form such as a Project Alliance Agreement PAA in Australia and numerous other countries or the Integrated Form of Agreement IFoA in North America The contract form adopted is used and has been strategically designed to accommodate the project's risk and uncertainty profile as is the case with the LXRPP Projects within the program are integrated with some being concurrently delivered with coordination across the projects in a coherent and highly purposeful manner Projects are not included that do not strategically fit the overall program delivery strategy There is a strategy for learning and innovation diffusion across projects concurrently and sequentially Lessons to be learned are learned through designed in governance mechanisms The LXRPP is a potentially unique program of projects and the book takes the reader on a journey through this complex program and after giving the background and relevant context covers topics such as strategy governance procurement collaboration program alliance HRM leadership digital innovation continuous improvement community engagement and performance measurement This detailed analysis of such a complex program of projects makes this book essential reading for project managers engineers and advanced students of project delivery and management

Implementation of Safety and Health on Construction Sites Amarjit Singh, Jimmie Hinze, Richard J. Coble, 1999-01-01 The text offers 123 articles on recent research and practice in construction safety from 19 developed countries Topics covered include safety management and planning education and training innovative safety technology site safety and progra

Design and the Economics of Building D. Jaggar, R R Morton, 2003-09-02 A textbook on design economics for students of architecture building and quantity surveying it examines the links between design and the costs of building as well as more general economic issues and their significance for designers and builders

Making Sense of Construction Improvement Stuart Green, 2023-12-15 Making Sense of Construction Improvement provides a critical evaluation of the construction improvement debate from the end of the Second World War through to the modern era The book offers unique insights into the way the UK construction sector is continuously shaped and re shaped in accordance with changes in the prevailing political economy This second edition brings the book up to date by including coverage of key trends from 2010 2023 The book has been substantially revised and reworked to include new material relating to the age of austerity and the subsequent period of political uncertainty initiated by the Brexit referendum Changes in the political economy are positioned alongside the rise of the sustainability agenda and

the advent of zero carbon Particular attention is paid to the ongoing skills crisis and the over hyped advocacy of modern methods of construction MMC as the latest supposed panacea of industry improvement Coverage includes the Farmer 2016 report Modernise or Die and the Construction Playbook HM Government 2020 However perhaps the most important addition is a focus on the Grenfell Disaster 2017 and the subsequent revelations from the public enquiry Further intermediate milestones include Building a Safer Future Hackitt 2018 and the Construction Sector Deal HM Government 2018 The emerging consensus points towards a systemic failure involving not only the construction sector but also the entire system of regulation and compliance Tracing the failings back over time and scrutinising the role played by previous generations of policymakers Stuart Green ultimately argues that Grenfell was a disaster entirely foretold The insightful and critical analysis of the industry contained within these pages is essential and timely reading for anyone who wants to understand how the construction sector arrived at where it is today and with that knowledge give further thought to where it might go next
