Calling the Shots Daniel P. Gitterman, 2017-02-14 Modern presidents are CEOs with broad powers over the federal government The United States Constitution lays out three hypothetically equal branches of government the executive the legislative and the judicial but over the years the president as head of the executive branch has emerged as the usually dominant political and administrative force at the federal level In fact Daniel Gitterman tells us the president is effectively the CEO of an enormous federal bureaucracy Using the unique legal authority delegated by thousands of laws the ability to issue executive orders and the capacity to shape how federal agencies write and enforce rules the president calls the shots as to how the government is run on a daily basis Modern presidents have for example used the power of the purchaser to require federal contractors to pay a minimum wage and to prohibit contracting with companies and contractors that knowingly employ unauthorized alien workers Presidents and their staffs use specific tools including executive orders and memoranda to agency heads as instruments of control and influence over the government and the private sector For more than a century they have used these tools without violating the separation of powers *Calling the Shots* demonstrates how each of these executive powers is a powerful weapon of coercion and redistribution in the president's political and policymaking arsenal

The Social Construction of Global Corruption Elitza Katarova, 2018-12-06 This book offers new ways of thinking about corruption by examining the two distinct ways in which policy approaches and discourse on corruption developed in the UN and the OECD One of these approaches extrapolated transnational bribery as the main form of corrupt practices and advocated a limited scope offense while the other approach tackled the broader structure of

the global economic system and advocated curbing the increasing power of multinational corporations. Developing nations in particular, Chile, initiated and contributed much to these early debates, but the US-sponsored issue of transnational bribery came to dominate the international agenda. In the process, the corrupt corporation was supplanted by the corrupt politician, the corrupt public official, and their international counterpart, the corrupt country. This book sheds light on these processes and the way in which they reconfigured our understanding of the state as an economic actor and the multinational corporation as a political actor.

Handbook of Research on Comparative Economic Development Perspectives on Europe and the MENA Region Erdoğan, M. Mustafa, Christiansen, Bryan, 2016-01-07. The MENA (Middle East and North Africa) region's economy is experiencing steady growth and is expanding as an active participant in investments with Europe, the Americas, and Asia. Complex deals by transnational corporations (TNCs) and small and medium-sized enterprises (SMEs) serve to influence European and MENA businesses, government, technology, and society. The *Handbook of Research on Comparative Economic Development Perspectives on Europe and the MENA Region* provides scholarly information about European and MENA economies at a time when these regions are becoming increasingly connected. The need to understand their economies has never been more necessary, and the research-based chapters of this book, covering a wide array of information regarding corruption and reform, ethics and society, and the effects of Western cultures, provide scholars, business executives, practitioners, and students with current information on the region's lucrative investments and fast-growing economy.
