the plants themselves highlighting those that can be relied upon to flower in winter on evergreen foliage plants that fill the garden with long term interest and on plants with unusually long seasons of colour Recognising that the period from autumn through to the bulbs of spring is the most difficult time for most gardeners planning an all the year garden Margery highlights hellebores and hardy cyclamen plants which in the 1950s were not considered particularly significant Through her persuasive prose based as ever on her own experiences at East Lambrook Manor she raises them to the first rank She also stirred interest in heathers as winter flowers in peat gardening and her infectious delight in collecting plants like hellebores and the old hose in hose primroses still delights us And all the while her own appreciation of the way her plants grew and her understanding of how to encourage them to give their best adds fundamental horticultural wisdom to her natural enthusiasm for the plants themselves This is a book that changed the way we garden
