

The WIND & The SUN

Name: _____

Date: _____

Read the story and answer the questions.

Once the Wind and the Sun had a dispute as to which was the stronger of the two. "Do you see that traveler plodding along the road?" said the Wind. "Let us both try our strength on him, and let the one who can first strip him of his cloak be the winner." "Agreed," said the Sun. The Wind began first. He blew a blast which sent the leaves flying through air; he raised clouds of dust in the road, bent the tops of the trees to

the ground, and even tore up one sturdy oak by the roots. But the traveler only drew his cloak the more tightly around his shoulders, and kept on his way. Then the Sun began. He burst out from behind a black cloud, and, little by little, darted his sultry beams upon the traveler's head and back. The man did not notice this much at first, but soon the heat was so great that he stopped to wipe the sweat from his face. "Ah!" he said, "I cannot stand this. It is so hot that one might as well be in an oven!" Then he threw off his cloak, and carried it under his arm; and when he came to a tree by the roadside he sat down under its shade to cool himself. After that, the Wind never claimed to be stronger than the Sun.

- ◇ What was the dispute between the Wind and the Sun?
- ◇ What did the Wind say to the Sun?
- ◇ What did the Wind do to prove its strength?
- ◇ How did Sun try its strength?
- ◇ What did Wind never claim again?

Cognitive Technology J.L. Mey, B. Gorayska, 1995-12-01 In this book the editors have gathered a number of contributions by persons who have been working on problems of Cognitive Technology CT The present collection initiates explorations of the human mind via the technologies the mind produces These explorations take as their point of departure the question What happens when humans produce new technologies Two interdependent perspectives from which such a production can be approached are adopted How and why constructs that have their origins in human mental life are embodied in physical environments when people fabricate their habitat even to the point of those constructs becoming that very habitat How and why these fabricated habitats affect and feed back into human mental life The aim of the CT research programme is to determine in general which technologies and in particular which interactive computer based technologies are humane with respect to the cognitive development and evolutionary adaptation of their end users But what does it really mean to be humane in a technological world To shed light on this central issue other pertinent questions are raised e g Why are human minds externalised i e what purpose does the process of externalisation serve What can we learn about the human mind by studying how it externalises itself How does the use of externalised mental constructs the objects we call tools change people fundamentally To what extent does human interaction with technology serve as an amplification of human cognition and to what extent does it lead to a atrophy of the human mind The book calls for a reflection on what a tool is Strong parallels between CT and environmentalism are drawn both are seen as trends having originated in our need to understand how we manipulate by means of the tools we have created our natural habitat consisting of on the one hand the cognitive environment which generates thought and determines action and on the other hand the physical environment in which thought and action are realised Both trends endeavour to protect the human habitat from the unwanted or uncontrolled impact of technology and are ultimately concerned with the ethics and aesthetics of tool design and tool use Among the topics selected by the contributors to the book the following themes emerge the list is not exhaustive using

technology to empower the cognitively impaired the ethics versus aesthetics of technology the externalisation of emotive and affective life and its special dialectic mirror effects creativity enhancement cognitive space problem tractability externalisation of sensory life and mental imagery the engineering and modelling aspects of externalised life externalised communication channels and inner dialogue externalised learning protocols relevance analysis as a theoretical framework for cognitive technology From the Classroom to the Test Adele Macula,2015-07-28 Today it is more essential than ever that
