- | | |

| b. <u>Disease</u> | d. <u>Overcrowding</u> |

7. When populations become crowded, what do organisms compete with one another for? They compete for food, water, space, oxygen, and other resources.

8. The mechanism of population control in which a population is regulated by predation is called a predator-prey relationship.

9. What are the prey and what are the predators in the predator-prey relationship in Isle Royale? The prey are moose and the predators are wolves.

10. Why does the wolf population on Isle Royale decline following a decline in the moose population? The wolf population declines because there is less to eat, causing them to starve.

11. How are parasites like predators? Like predators, parasites use their bodies to feed on the bodies of their hosts, often weakening them and causing disease or death.
