formulate and empirically evaluate an integrated CE model that reflects the integrative complexity of the antecedents driving CEA The study context is the South African banking sector where primary data n 312 is obtained via a structured survey Four meta hypotheses and several sub hypotheses reflecting the organizational individual and environmental level antecedents are tested using partial least squares structural equation modeling PLS SEM FINDINGS The main study finding validates that corporate strategy is the bedrock of CEA The results also reveal that entrepreneurial strategy entrepreneurial structure transformational leadership organizational resources and an entrepreneurial mindset are significant predictors of CEA IMPLICATIONS Practical implications highlight that it is important for managers to consider the configuration of the predictors within the CE model which function as pathways to entrepreneurial corporate strategy ORIGINALITY AND VALUE Our study makes a unique contribution by developing and testing an integrated and comprehensive model reflecting the dynamic complexity of the antecedents driving CEA It is anticipated that the results will allow researchers to compare and examine comparable antecedents to CEA and their applicability in global country contexts Keywords corporate entrepreneurship antecedents entrepreneurial strategy organizational resources transformational leadership entrepreneurial mindset partial least squares structural equation modelling PLS SEM South Africa Pushing coopetition research further Understanding relevance and operationalization of the attributes of coopetition strategies and cooperative relationships PURPOSE Although coopetition was defined three decades ago and is intensively investigated its theoretical and research cognition remains far from thoroughly understood The lack of conceptual consistency prevents researchers from conducting comparable research leading to more generalizable results and thus from building coherent knowledge This study addresses the above shortcoming by the development of operationalizations of two types of attributes assigned to coopetition strategic attributes characterizing coopetition strategies and relational attributes characterizing cooperative relationships METHODOLOGY In our study we adopted a two step research process consisting of qualitative verification of a list of 8 coopetition attributes 2 strategic and 6 relational identified in prior literature as relevant for coopetition success and the development of integrative conceptualization and measurement approaches for them The verification was conducted through focus group interviews with scholars experienced in coopetition research and senior managers from firms adopting coopetition strategies The measurement approaches for the positively verified attributes were developed through the integration of 1 approaches used so far in coopetition literature 2 approaches used to date in the literature on the features of inter organizational relationships and 3 approaches that emerged during the focus group interviews FINDINGS This study shows two strategic i e dynamics and paradoxicality and six relational i e asymmetry complexity intensity mutual dependence strength and tensions coopetition attributes as heterogeneously relevant for coopetition success and offers multi item operationalizations for them derived from a combination of prior literature and qualitative research IMPLICATIONS Our paper shows strategic and relational attributes of coopetition as theoretically and practically relevant for coopetition success

**ORIGINALITY AND VALUE** As a contribution this study offers scientifically grounded operationalizations of eight attributive success factors of coopetition. The developed measurement proposals can find valuable applications in two ways. First, coopetition researchers can use them in their studies and a consistent measurement approach will allow for the comparison of research results, bringing us closer to drawing more general conclusions. Second, coopetition practitioners can use these proposals when managing coopetition, for instance to evaluate, monitor, and intentionally shape them to make coopetition more successful. **Keywords:** coopetition, focus group, interviews, operationalization, measurement scale, cooperative relationships, coopetition strategies. **Guiding incumbent companies in navigating digital transformations:** A qualitative study on structural ambidexterity and strategic leadership. **PURPOSE:** Despite digital transformation being a focus topic for incumbent companies, organizational structures are a significant barrier to their success. Referring to the positive correlation between ambidexterity and digital innovation, our research provides guidance on structural ambidexterity for incumbent companies. Previous research has barely differentiated between exploration and exploitation in digital transformation. In the present paper, we fill part of this research gap by focusing on structural ambidexterity in digital transformations and providing guidance on how incumbent companies can overcome organizational challenges. **METHODOLOGY:** Our research is based on an explorative research design with 33 semi-structured interviews that allow in-depth information. The interview partners were selected using purposive sampling and represented different industry and hierarchy levels. All of them have been in a position related to digital transformation in an incumbent company for the last two years. We ensure scholarly rigor using thematic analysis to analyze our data. **FINDINGS:** Our decision tree guides separation or integration based on the closeness of digital activities to the core business and the association of the activities to exploration or exploitation. Additionally, we recommend considering the digital maturity grade in the decision making. Developing a cross-functional digital transformation strategy and pursuing a balanced portfolio fosters ambidexterity in digital transformation. Clear responsibilities, collaborative decision making, candidate selection, and collaboration with IT are essential leadership activities. **IMPLICATIONS for theory and practice:** Our research expands the existing research on digital transformations of incumbent companies. We specifically contribute to the limited details on how to separate digital activities considering an exploration/exploitation perspective. Our study guides practitioners to address one of their major challenges in digital transformations with the help of our decision tree. **ORIGINALITY AND VALUE:** Based on the positive correlation between ambidexterity and digital innovation, our study contributes to the existing research by providing in-depth knowledge of structural ambidexterity in digital transformations. This detailed information is essential to provide knowledge on enabling the positive correlation between ambidexterity and innovation in the context of structural ambidexterity. **Keywords:** digital transformation, digitalization, organizational structures, structural ambidexterity, temporal ambidexterity, incumbent companies, guidelines. **Leveraging green innovation from big data analytics:** Examining the role of resource orchestration and green dynamic

capabilities PURPOSE The notion of big data analytics BDA has received increased attention from both researchers and managers Keeping in view the significance of BDA the current research aims to examine the role of BDA capability to leverage firm green innovation GI Drawing from the dynamic capability view current study suggests that BDA capability prompts green dynamic capabilities DCs enabling organizations to attain GI successfully Particularly present study proposes that BDA analytics prompt GI directly as well as through green DCs Moreover this study also draws from complementarity perspective and proposes that resource orchestration capability ROC is likely to enhance the effectiveness of green DCs in eliciting GI Thus the objectives of the current study are threefold first it aims to unveil the role of BDA capability in prompting GI second it examines the mediating role of green DCs for the relationship between BDA capability and GI and third this research examines the moderating effect of ROC to examine if it strengthens the effects of green DCs METHODOLOGY This study involves testing hypotheses using primary data collected by using the method of survey questionnaire The data were collected from 291 Pakistani organizations Pakistan is an emerging economy where businesses are responsible for substantial amounts of carbon di oxide and greenhouse gasses GHG emissions Therefore Pakistani organizations serve as a suitable context for the study The respondent organizations were from both the manufacturing and service sectors PLS SEM was employed as an analytical approach for testing the hypotheses Construct validity and reliability were confirmed prior to hypotheses testing FINDINGS Results demonstrate that BDA capability positively affects GI 0 33 p

Voices of Innovation Edward W. Marx,2023-07-17 Everyone talks innovation and we can all point to random examples of innovation inside of healthcare information technology but few repeatable processes exist that make innovation more routine than happenstance How do you create and sustain a culture of innovation What are the best practices you can refine and embed as part of your organization s DNA What are the potential outcomes for robust healthcare transformation when we get this innovation mystery solved Through timely essays from leading experts the first edition showcased the widely adopted healthcare innovation model from HIMSS and how providers could leverage to increase their velocity of digital transformation Regardless of its promise innovation has been slow in healthcare The second edition takes the critical lessons

learned from the first edition expands and refreshes the content as a result of changes in the industry and the world. For example, the pandemic really shifted things. Now providers are more ready and interested to innovate. In the past year alone, significant disruptors such as access to digital health have entered the provider space, threatening the existence of many hospitals and practices. This has served as a giant wake-up call that healthcare has shifted. And finally, there is more emphasis today than before on the concept of patient and clinician experience. Perhaps hastened by the pandemic, the race is on for innovations that will help address clinician burnout while better engaging patients and families. Loaded with numerous case studies and stories of successful innovation projects, this book helps the reader understand how to leverage innovation to help fulfill the promise of healthcare information technology in enabling superior business and clinical outcomes.
