The Participatory Turn Jorge N. Ferrer,Jacob H. Sherman,2008-10-23 Can we

take seriously religious experience spirituality and mysticism without reducing them to either cultural linguistic by products or simply asserting their validity as a dogmatic fact The contributors to this volume argue that we can and they offer a new way the participatory turn which proposes that individuals and communities have an integral and irreducible role in bringing forth ontologically rich religious worlds They explore the ways this approach weaves together and gives voice to a number of robust trends in contemporary religious scholarship including the renewed study of lived spirituality the postmodern emphasis on embodied and gendered subjectivity the admission of alternate epistemic perspectives the irreducibility of religious pluralism and the pragmatist emphasis on transformation all trends that raise serious challenges to the currently prevalent linguistic paradigm The first part of the book situates the participatory turn in the context of contemporary Religious Studies the second part shows how this approach can be applied to various global traditions ancient and contemporary from Western esotericism to Jewish mysticism Christianity Hinduism Sufism and socially engaged Buddhism

The Age of Ideology Henry David Aiken, 1956 **An Examination of Conscience of the Understanding** Richard L. Scott, 2016-12-29 An Examination of Conscience of the Understanding Empirical Proof of the Existence of God by Richard L. Scott Seeking his own utmost depth of comprehensive understanding the author sets out to prove empirically that God exists The seed of proof is the Birth Paradox its florescence a faith grounded in his spirituality disposed soul As empirically real as his conscious self as mathematically certain as the probability laws of genetic science as necessary as that the universe requires a creator for its rational possibility as immanently intuitive as the Divine Allegory he mirrors The Birth Paradox is the contingency of personal conscious existence on the body Is there any scientific or commonsense belief as certain of itself And yet as a practical proposition it is an utterly impossible conjunction Personal consciousness is necessary specific to its own experience a subtly profound tautology How is it then that one's necessary being can be dependent on a chance body

A Theory of Craft Howard Risatti, 2009-12 What is craft How is it different from fine art or design In A Theory of Craft Howard Risatti examines these issues by comparing handmade ceramics glass metalwork weaving and furniture to painting sculpture photography and machine made design from Bauhaus to the Memphis Group He describes craft's unique qualities as functionality combined with an ability to express human values that transcend temporal spatial and social boundaries Modern design today has taken over from craft the making of functional objects of daily use by employing machines to do work once done by hand Understanding the aesthetic and social implications of this transformation forces us to see craft as well as design and fine art in a new perspective Risatti argues Without a way of understanding and valuing craft on its own terms the field languishes aesthetically being judged by fine art criteria that automatically deny art status to craft objects Craft must articulate a role for itself in contemporary society says Risatti otherwise it will be absorbed by fine art or design and its singular approach to understanding the world will be lost A Theory of Craft is a signal contribution to establishing a craft theory that recognizes defines and celebrates the unique blend of function and human aesthetic values embodied in the
