the ways you've been hurt or harmed There's a constant churn of unprocessed feelings of shame anger grief or loneliness And your body tells the story of its struggles in a myriad of aches and ailments Little by little you find yourself becoming disconnected from who you truly are Not knowing what to do with your suffering and fearing you'll be hurt again you've learned to cope to numb and suppress the ache within **Pocket Guide to Interpersonal Neurobiology** Daniel J.

Siegel, 2012-04-02 The central concepts of the theory of interpersonal neurobiology Many fields have explored the nature of mental life from psychology to psychiatry literature to linguistics Yet no common framework where each of these important perspectives can be honored and integrated with one another has been created in which a person seeking their collective wisdom can find answers to some basic questions such as What is the purpose of life Why are we here How do we know things how are we conscious of ourselves What is the mind What makes a mind healthy or unwell And perhaps most importantly What is the connection among the mind the brain and our relationships with one another Our mental lives are profoundly relational The interactions we have with one another shape our mental world Yet as any neuroscientist will tell you the mind is shaped by the firing patterns in the brain And so how can we reconcile this tension that the mind is both embodied and relational Interpersonal Neurobiology is a way of thinking across this apparent conceptual divide This Pocket Guide to Interpersonal Neurobiology is designed to aid in your personal and professional application of the interpersonal neurobiology approach to developing a healthy mind an integrated brain and empathic relationships It is also designed to assist you in seeing the intricate foundations of interpersonal neurobiology as you read other books in the Norton Series on Interpersonal Neurobiology Praise for Daniel J Siegel's books Siegel is a must read author for anyone interested in the science of the mind Daniel Goleman author of Social Intelligence The New Science of Human Relationships stands out for its skillful weaving together of the interpersonal the inner world the latest science and practical applications Jack Kornfield PhD founding teacher of the Insight Meditation Society and Spirit Rock Center and author of A Path With Heart Siegel has both a meticulous understanding of the roles of different parts of the brain and an intimate relationship with mindfulness A n exciting glimpse of an uncharted territory of neuroscience Scientific American Mind Dr Daniel Siegel is one of the most thoughtful eloquent scientifically solid and reputable exponents of mind body brain integration in the world today Jon Kabat Zinn PhD author of Wherever You Go There You Are Full Catastrophe Living and Coming to Our Senses *Reclaiming Your Body* Suzanne Scurlock-Durana, 2017-05-15 A guided tour through the body's innate healing powers Many of us have learned to ignore deny or even mistrust the wise messages our bodies give us The result is that when trauma strikes a time when we need every aspect of our beings to master the challenge we may find ourselves disconnected from our greatest strengths Suzanne Scurlock Durana who has spent thirty years studying the gifts of the body and teaching thousands how to reclaim them began to recognize this strength which she likens to a GPS when she herself experienced a life threatening trauma Here she walks readers through different areas of the body revealing the wisdom they hold and how to reconnect with that
