highlighting important and interesting figures in the world of jazz and free improvisation that may have fallen through the cracks such as the pianist Richard Twardzik and the Ganelin trio which recorded their great experimental work Ancora da Capo in 1980 behind the Iron Curtain Attention is also given to more popular figures such as Stan Getz The volume is completed with a series of essays reappraising Roman poets in the twenty first century offering fresh new translations and readings of authors such as Catullus and Callimachus A collection of essays like an anthology is by its nature incomplete Essays on the Peripheries is a kind of sketch rather than a finished portrait of the author's changing impressions on various subjects over the years

was a poet of the cinema as James Ivory says in the book's foreword who left a trove of words on paper that can live on as the fast deteriorating images he created on celluloid cannot. This generous selection of poems will be welcomed by poetry lovers and film buffs alike and will be an event in American letters.

**Post-Western Histories of Architecture** Pilar Maria Guerrieri, Marco Biraghi, 2023-06-23. This book seeks to provide an alternative post-Western perspective to the history of contemporary architecture. It puts forward detailed critical analyses of various areas of the world including Europe, Latin America, Africa, China, Australia, India, and Japan, where particular movements of architecture have developed as active political acts. The authors focus on a broad spectrum of countries, architectures, and architects that have developed a design approach closely linked to the building context. The concept of context is broad and includes various economic, social, cultural, political, and natural aspects. In all cases, the architects selected in this book have chosen to view context as an opportunity. However, each architect has considered certain specific aspects of context: some have been very attentive to the social context, others to material aspects or typological issues, and still others to aspects related to political visions or economic factors. The analysis critically highlights interesting, creative, and respectful design approaches towards local conditions such as sustainability in Nordic Europe, climate-conscious design in Africa, and the bottom-up sensitivity of India. The book's main aim is to retrace through both theoretical arguments and case studies the debate that focuses on politics and the environment. Thanks to its valuable examples, this book strives to make a conscious contribution to establishing a bulwark against the current flattening-out processes that architecture is experiencing. This book will be of relevance to researchers, teachers, and students interested in the history of architecture, architecture and planning, and postcolonial studies.
