God and the Nature of Time Garrett J. DeWeese, 2017-03-02 Is God temporal in time or atemporal outside of time Garrett DeWeese begins with contemporary metaphysics and physics developing a causal account of dynamic time Drawing on biblical material as well as discussions of divine temporality in medieval and contemporary philosophical theology DeWeese concludes that God is temporal but not in physical time as we measure it Interacting with issues in the history of philosophy contemporary philosophy of science and philosophy of religion this book offers students a thorough introduction to the key issues and key figures in historical and contemporary work on the philosophy of time and time in theology

What Caused the Big Bang? Rem B. Edwards, 2021-07-26 This book critically explores answers to the big question What produced our universe around fifteen billion years ago in a Big Bang It critiques contemporary atheistic cosmologies including Steady State Oscillationism Big Fizz Big Divide and Big Accident that affirm the eternity and self sufficiency of the universe without God This study defends and revises Process Theology and arguments for God's existence from the universe's life supporting order and contingent existence Dialogues on The Nature of Time Sanjar Ali Khan, 2011-03 This book is about nature specifically on the impact of time on nature's various aspects A novel approach is attempted to present new ideas through the medium of imaginary discussions principally between two animal characters a hare and a tortoise These characters have been accorded certain human characteristics language basic education and knowledge of scientific concepts as put forward through quotations from scientists scholars and philosophers The ideas and concepts about time and natural phenomena are exemplified through a series of meetings between the two animal characters who sort out their own ideas and beliefs about the mysteries of time *Time Now: The True Nature of Reality* Colin Gillespie, 2025-09-16 Time Now will change the way you think about reality Physicist and author Colin Gillespie brings together centuries of ancient thought and modern insights to unearth what is real and what is not He tells the story of our universe from the very beginning before the Big Bang and reveals to us a whole new view of time Gillespie writes with humor and gives deft explanations of complex concepts He helps us find the inner truths about the universe and about ourselves And he does it in a way that is accessible inspiring and entertaining

The Unconscious as Space Anca Carrington, 2024-06-03 The Unconscious as Space explores the experience of being and the practice of psychoanalysis by thinking of the unconscious in mathematical terms Anca Carrington introduces mathematical models of space from dimension theory to algebraic topology and knot theory and considers their immediate psychoanalytic relevance The hypothesis that the unconscious is structured like a space marked by impossibility is then examined Carrington considers the clinical implications with particular focus on the interplay between language and the unconscious as related topological spaces in which movement takes place along knot like pathways The

Unconscious as Space will be of appeal to psychotherapists psychoanalysts and mental health professionals in practice and in training

Lumen Naturae Matilde Marcolli, 2020-05-26 Exploring common themes in modern art mathematics and science including the concept of space the notion of randomness and the shape of the cosmos This is a book about art and a book about mathematics and physics In *Lumen Naturae* the title refers to a purely immanent non supernatural form of enlightenment mathematical physicist Matilde Marcolli explores common themes in modern art and modern science the concept of space the notion of randomness the shape of the cosmos and other puzzles of the universe while mapping convergences with the work of such artists as Paul Cezanne Mark Rothko Sol LeWitt and Lee Krasner Her account focusing on questions she has investigated in her own scientific work is illustrated by more than two hundred color images of artworks by modern and contemporary artists Thus Marcolli finds in still life paintings broad and deep philosophical reflections on space and time and connects notions of space in mathematics to works by Paul Klee Salvador Dal and others She considers the relation of entropy and art and how notions of entropy have been expressed by such artists as Hans Arp and Fernand L ger and traces the evolution of randomness as a mode of artistic expression She analyzes the relation between graphical illustration and scientific text and offers her own watercolor decorated mathematical notebooks Throughout she balances discussions of science with explorations of art using one to inform the other She employs some formal notation which can easily be skipped by general readers Marcolli is not simply explaining art to scientists and science to artists she charts unexpected interdependencies that illuminate the universe

The Nature of Consciousness, the Structure of Reality Jerry Davidson Wheatley, 2001 This book describes how understanding the structure of reality leads to the Theory of Everything Equation The equation unifies the forces of nature and enables the merging of relativity with quantum theory The book explains the big bang theory and everything else

A Century in Books Princeton University Press Staff,2021-10-12 It all began atop a drugstore in Princeton New Jersey in November 1905 From its modest beginnings Princeton University Press was to become one of the world s most important scholarly publishers embracing a wealth of disciplines that have enriched our cultural academic and scientific landscape Both as a tribute to our authors and to celebrate our centenary Princeton University Press here presents A Century in Books This beautifully designed volume highlights 100 of the nearly 8 000 books we have published Necessarily winnowed from a much larger list these books best typify what has been most lasting most defining and most distinctive about our publishing history from Einstein s The Meaning of Relativity 1922 to the numerous mathematical and other works that marked the Press s watershed decade of the 1940s including von Neumann and Morgenstern s Theory of Games and Economic Behavior from milestones of literary criticism by Erich Auerbach and Northrop Frye to George Kennan s Pulitzer Prize winning book on Soviet American relations from Milton Friedman and Anna Jacobson Schwartz s A Monetary History of the United States 1867 1960 to more recent landmarks such as L Luca Cavalli Sforza Paolo Menozzi and Alberto Piazza s The History and Geography of Human Genes and Robert Shiller s Irrational Exuberance In addition to succinct descriptions of the 100 titles and a short introduction on the history of the Press the book features five essays by prominent scholars and writers Michael Wood discusses the impact on Princeton University Press of intellectuals who fled Nazi Germany and authored many influential books Anthony Grafton recounts our rich publishing tradition in history politics and culture Sylvia Nasar traces our evolution into a leading voice in economics publishing Daniel Kevles reflects on Einstein a figure of special importance to Princeton And Lord Robert May writes on our long standing tradition of publishing in mathematics and science A Century in Books is more than a celebration of 100 years of publishing at Princeton University Press it is a treasure trove of 100 years of books that have added to the richness of twentieth century intellectual life

On the Moral Nature of the Universe Nancey C. Murphy,George Francis Rayner Ellis, Ellis and Murphy show how contemporary sciences actually support a religiously based ethic of nonviolence not by appealing to the Enlightenment s mechanistic Creator God or revelation s Father God but by discerning the transcendent ground in the laws of nature the emergence of intelligent freedom and the echoes of knoetic self giving in cosmology and biology

A Quotidian Quash Dorian Redus,2022-12-27 This manuscript was not supposed to go public However because it was written in three joined parts and over two consecutive years there was a problem as to what to call it chronically 1969 2011 or 1969 2012 So the author chose the latter Author Mr Redus has looked into the cathode ray tube of his soul to find his way out of his commonplace silencing It is what A Quotidian Quash really means Actually in his book the evolving cosmological TV energy of his puzzling psychiatric history from junior college years to decades as a psychiatric inpatient unfolds and jumps A Quotidian Quash also puts forth two new cosmic theories RCTVU

relativistic color television universe and STS space time sphere as Mr Redus also blows the whistle on California s Department of State hospitals for being a psychiatric minatorial minotaur masquerading as a menial mentor There is evidence of his many past psychiatrists paranoia in this book but when his psychiatric future arrives his tomorrow comes to us as his RCTVU theory pristine and virgin it is excellent and okay as it puts itself in his creative hands Moreover it requires that we have learned something from our evolutionary yesterday or from God in and subtly outside of his book s other speculative theory STS theory This is a book of many therapeutic letters mostly to his California therapists And in it we learn that they were so very interested in recording something wrong with him their long term psychiatric patient Mr Redus that there became something very obviously paranoid and wrong with how all of his California therapists treated him their long term psychiatric patient from the start of his treatment to the finish of my treatment with them Mr Redus was sequestered by psychiatrists who were checked and balanced only by their own inappropriate oblivion to their regular mistakes and convenient misstatements

A Briefer History of Time Leonard Mlodinow, Stephen Hawking, 2010-01-26 Like prior editions of the book but even more so A Briefer History of Time will guide non scientists everywhere in the ongoing search for the tantalizing secrets at the heart of time and space This is Stephen Hawking s somewhat briefer account of his up to date and most recent scientific observations and findings A great companion to his original worldwide bestseller A Brief History of Time From curved space to quantum theory the authors have expanded on areas of special interest and recent progress such as developments in string theory and exciting progress in the search for a force of complete unified theory of all the forces of physics Thirty eight full colour illustrations enhance the text and make A Briefer History of Time an exhilarating addition in its own right to the literature of science
