The Lever of Riches Joel Mokyr,1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous

developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity

*The Lever of Riches* with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential

*Alice Walker* Gerri Bates, 2005-10-30 Alice Walker born in Eatonton Georgia in 1944 overcame a disadvantaged sharecropping background blindness in one eye and the tense times of the Civil Rights Movement to become one of the world's most respected African American writers While attending both Spelman and Sarah Lawrence Colleges Walker began to draw on both her personal tragedies and those of her community to write poetry essays short stories and novels that would tell the virtually untold stories of oppressed African and African American women providing readers with hope and inspiring activism Perhaps best known for her novel *The Color Purple* 1982 which won the Pulitzer Prize in 1983 and became a controversial film three years later Walker has introduced and developed womanist theory criticism and practice and continues to champion the causes of women of color by encouraging their strength and liberation in her life and her writings

Literary works analyzed in this volume *The Third Life of Grange Copeland* *Meridian* *The Color Purple* *The Temple of My Familiar* *Possessing the Secret of Joy* *By the Light of My Father's Smile* *The Way Forward Is With a Broken Heart* *Now is the Time to Open Your Heart*

*The Cambridge Guide to Women's Writing in English* Lorna Sage, 1999-09-30 This Guide aims to consolidate and epitomise the re-reading of women's writing that has gone on in the last twenty five years This is an opportunity for stock taking a timely project when so much writing has been rediscovered reclaimed and republished There are entries on writers on individual texts and on general terms genres and movements all printed in a single alphabetical sequence The earliest written documents in medieval English the visionary writings of Julian of Norwich and Margery Kempe are covered in an historical and geographical sweep that takes us up to the present day The book reflects the spread of literacy the history of colonisation and the development of post colonial cultures using and changing the English language The entries are written by contributors from all the countries covered The result is a work of
