Congress. Office of Technology Assessment, 1990 *Surveillance Capitalism in America* Josh Lauer, Kenneth Lipartito, 2021-10-15 *Surveillance Capitalism in America* offers a crucial historical perspective on the intimate relationship between surveillance and capitalism While surveillance is often associated with governments today the role of the private sector in the spread of everyday surveillance is the subject of growing public debate Tech giants like Google and Facebook are fueled by a continuous supply of user data and digital exhaust Surveillance is not just a side effect of digital capitalism it is the business model itself suggesting the emergence of a new and more rapacious mode of capitalism surveillance capitalism But how much has capitalism really changed *Surveillance Capitalism in America* explores the historical development of commercial surveillance long before computers and suggests that surveillance has been central to American capitalism since the nation's founding Managers surveilled labor merchants surveilled consumers and businesses surveilled each other Focusing on events in the United States the chapters in this volume examine the deep logic of modern surveillance as a mode of rationalization bureaucratization and social control from the early nineteenth century forward Even

more business surveillance has often involved collaborations with the state through favorable laws policing and information sharing The history of surveillance capitalism is thus the history of technological legal and knowledge infrastructures built over decades Together the chapters in this volume reveal the long arc of surveillance capitalism from the violent coercion of slave labor to the seductions of target marketing

Vice Patrol Anna Lvovsky, 2024-05-31 In the mid twentieth century gay life flourished in American cities even as the state repression of queer communities reached its peak Liquor investigators infiltrated and shut down gay friendly bars Plainclothes decoys enticed men in parks and clubs Vice officers surveilled public bathrooms through peepholes and two way mirrors In *Vice Patrol* Anna Lvovsky chronicles this painful story tracing the tactics used to criminalize profile and suppress gay life from the 1930s through the 1960s and the surprising controversies those tactics often inspired in court Lvovsky shows that the vice squads campaigns stood at the center of live debates about not only the law s treatment of queer people but also the limits of ethical policing the authority of experts and the nature of sexual difference itself debates that had often unexpected effects on the gay community s rights and freedoms Examining those battles *Vice Patrol* enriches understandings of the regulation of queer life in the twentieth century and disputes about police power that continue today

Homemaking Catherine Wiley, Fiona R. Barnes, 2021-11-18 First published in 1996 The present volume *Homemaking Women Writers and the Politics and Poetics of Home* enters the critical discourse on gender by way of two of its most pressing issues the politics of women s locations at the end of the twentieth century and the division of experience into public and private That the emergence of systematic feminist thought in the west coincided with the invention of private life should not surprise us Feminist thinkers from Mary Wollstonecrofton were quick to realize that the designation of the public and the private male and female was key to the subordination of women

Geography and Technology Stanley D. Brunn, Susan L. Cutter, J.W. Harrington Jr., 2004-05-31 It is particularly appropriate that the AAG s Centennial Celebration should prompt the publication of a volume devoted to Geography and Technology New technologies have always been important in advancing geographic understanding but never have they been so thoroughly and rapidly transformative of the discipline as at this stage in geography s evolution Just as new technologies have profoundly expanded both research possibilities and the knowledge base of other disciplines such as biology physics or medicine so too are the revolutionary new geographic technologies developed during the past few decades extending frontiers in geographic research education and applications They are also creating new and resurgent roles for geography in both society and in the university This trend is still accelerating as the integration of geographic technologies such as the global positioning system and geographic information systems GPS GIS is creating an explosion of new real time real world applications and research capabilities The resultant dynamic space time interactive research and management environments created by interactive GPS GIS among other technologies places geography squarely at the forefront of advanced multidisciplinary research and modeling programs and has created core organization management tools geographic management systems which will

dramatically change the way governments and businesses work in the decades ahead While these and other important geographic technologies including remote sensing location based services and many others addressed in this book are forging new opportunities for geography and geographers they also pose challenges

Public Parts Jeff Jarvis, 2011-09-27 A visionary and optimistic thinker examines the tension between privacy and publicness that is transforming how we form communities create identities do business and live our lives Thanks to the internet we now live more and more in public More than 750 million people and half of all Americans use Facebook where we share a billion times a day The collective voice of Twitter echoes instantly 100 million times daily from Tahrir Square to the Mall of America on subjects that range from democratic reform to unfolding natural disasters to celebrity gossip New tools let us share our photos videos purchases knowledge friendships locations and lives Yet change brings fear and many people nostalgic for a more homogeneous mass culture and provoked by well meaning advocates for privacy despair that the internet and how we share there is making us dumber crasser distracted and vulnerable to threats of all kinds But not Jeff Jarvis In this shibboleth destroying book Public Parts argues persuasively and personally that the internet and our new sense of publicness are in fact doing the opposite Jarvis travels back in time to show the amazing parallels of fear and resistance that met the advent of other innovations such as the camera and the printing press The internet he argues will change business society and life as profoundly as Gutenberg s invention shifting power from old institutions to us all Based on extensive interviews Public Parts introduces us to the men and women building a new industry based on sharing Some of them have become household names Facebook s Mark Zuckerberg Google s Eric Schmidt and Twitter s Evan Williams Others may soon be recognized as the industrialists philosophers and designers of our future Jarvis explores the promising ways in which the internet and publicness allow us to collaborate think ways how we manufacture and market buy and sell organize

and govern teach and learn He also examines the necessity as well as the limits of privacy in an effort to understand and thus protect it This new and open era has already profoundly disrupted economies industries laws ethics childhood and many other facets of our daily lives But the change has just begun The shape of the future is not assured The amazing new tools of publicness can be used to good ends and bad The choices and the responsibilities lie with us Jarvis makes an urgent case that the future of the internet what one technologist calls the eighth continent requires as much protection as the physical space we share the air we breathe and the rights we afford one another It is a space of the public for the public and by the public It needs protection and respect from all of us As Secretary of State Hillary Clinton said in the wake of the uprisings in the Middle East If people around the world are going to come together every day online and have a safe and productive experience we need a shared vision to guide us Jeff Jarvis has that vision and will be that guide *Computer Privacy* United States. Database Nation Simson Garfinkel,2000-12-04 Fifty years ago in 1984 George Orwell imagined a future in which privacy was demolished by a totalitarian state that used spies video surveillance historical revisionism and control over the media to maintain its power Those who worry about personal privacy and identity especially in this day of technologies that encroach upon these rights still use Orwell s Big Brother language to discuss privacy issues But the reality is that the age of a monolithic Big Brother is over And yet the threats are perhaps even more likely to destroy the rights we ve assumed were ours Database Nation The Death of Privacy in the 21st Century shows how in these early years of the 21st century advances in technology endanger our privacy in ways never before imagined Direct marketers and retailers track our every purchase surveillance cameras observe our movements mobile phones will soon report our location to those who want to track us government eavesdroppers listen in on private communications misused medical records turn our bodies and our histories against us and linked databases assemble detailed consumer profiles used to predict and influence our behavior Privacy the most basic of our civil rights is in grave peril Simson Garfinkel journalist entrepreneur and international authority on computer security has devoted his career to testing new technologies and warning about their implications This newly revised update of the popular hardcover edition of Database Nation is his compelling account of how invasive technologies will affect our lives in the coming years It s a timely far reaching entertaining and thought provoking look at the serious threats to privacy facing us today The book poses a disturbing question how can we protect our basic rights to privacy identity and autonomy when technology is making invasion and control easier than ever before Garfinkel s captivating blend of journalism storytelling and futurism is a call to arms It will frighten entertain and ultimately convince us that we must take action now to protect our privacy and identity before it s too late Census Tract Papers ,1965
