S. Treip,1978 **Clinical Neuropathology** Catherine Haberland, MD,2006-12-27 Divided into fourteen chapters this text and full color atlas is a complete overview of the pathologic and clinical aspects of neurologic diseases

Clinical Neuropathology is written for practicing neurologists and pathologists as well as residents and fellows preparing for the neurology and pathology boards. It provides information on the structural alterations of nervous system diseases along with their clinical manifestations. The first two chapters cover the process and goals of the neuropathologic exam and histological reactions particular to the nervous system. Subsequent chapters review major disease categories with each section containing an overview of pathologic and clinical characteristics in general, a description of the gross and histologic features along with their clinical features and data on pathogenetic mechanisms. Filled with tables to clarify major points, case histories to provide clinical correlates, and Board type chapter review questions with answers and explanations, this text will be a valuable addition to all individual and reference libraries.

Key Benefits: Almost 600 full color illustrations. Case histories keyed to images provide clinical correlation with pathology. Over 90 tables summarizing key points useful for quick reference and exam preparation. End of chapter Board type questions with answers and explanations for self assessment and exam preparation.

Greenfield's Neuropathology Joseph Godwin Greenfield, 2015. Greenfield's Neuropathology, the world's leading neuropathology reference, provides an authoritative comprehensive account of the pathological findings in neurological disease, their biological basis, and their clinical manifestations. Underpinning the text is a clear description of the molecular and cellular processes and reactions that are relevant to the development and normal and abnormal functioning of the nervous system. Care has been taken to ensure that the information is accessible to readers working within a range of disciplines in the clinical neurosciences and that the neuropathological findings are placed within the context of a broader diagnostic process. New for the ninth edition, an expert truly international editorial team of the highest calibre have recruited many new international key opinion leaders to provide a fresh perspective whilst retaining the depth, breadth, and quality of content so praised in previous editions. Many new new colour illustrations and clinical photographs of excellent quality are included in image galleries to provide the comprehensive collection needed for research and clinical practice. Greenfield's is now available in on line and downloadable digital formats with rapid search functions, image collections, and live reference links. Presigious and erudite yet with a practical approach, Greenfield's continues to provide comprehensive and definitive trusted information to all neuropathologists and related specialties including neurologists, neurosurgeons, general pathologists, neuroradiologists, and clinical neuroscientists.
