The Water Wars By Cameron Stracher:

The Water Wars Cameron Stracher, 2011-10-01 Welcome to a future where water is more precious than oil or gold. Hundreds of millions of people have already died and millions more will soon fall victims of disease, hunger, and dehydration. It is a time of drought and war. The rivers have dried up, the polar caps have melted, and drinkable water is now in the hands of the powerful few. There are fines for wasting it and prison sentences for exceeding the quotas. But Kai didn't seem to care about any of this. He stood in the open road drinking water from a plastic cup, then spilled the remaining drops into the dirt. He didn't go to school and he traveled with armed guards. Kai claimed he knew a secret something the government is keeping from us. And then he was gone. Vanished in the middle of the night. Was he kidnapped? Did he flee? Is he alive or dead? There are no clues, only questions. And no one can guess the lengths to which they will go to keep him silent. We have to find him and the truth before it is too late for all of us.

Blue Ecocriticism and the Oceanic Imperative Sidney I. Dobrin, 2021-03-28 This book initiates a conversation about blue ecocriticism, critical ethical, cultural, and political positions that emerge from oceanic or aquatic frames of mind rather than traditional land-based approaches. Ecocriticism has rapidly become not only a disciplinary, legitimate critical form but also one of the most dynamic, active criticisms to emerge in recent times. However, even in its institutional success, ecocriticism has exemplified an ocean deficit. That is, ecocriticism has thus far primarily been a land-based criticism stranded on a liquid planet. Blue Ecocriticism and the Oceanic Imperative contributes to efforts to overcome ecocriticism's ocean deficit. The chapters explore a vast archive of oceanic literature, visual art, television, and film, games, theory, and criticism. By examining the relationships between these representations of ocean and cultural imaginaries, Blue Ecocriticism works to unmoor ecocriticism from its land-based anchors. This book aims to simultaneously advance blue ecocriticism as an intellectual pursuit within the environmental humanities and to advocate for ocean conservation as derivative of that pursuit.

The Cambridge Companion to Twenty-First Century American Fiction Joshua Miller, 2021-09-23 Reading lists, course syllabi, and prizes include the phrase "21st century American literature," but no critical consensus exists regarding when the period began, which works typify it, how to conceptualize its aesthetic priorities, and where its geographical boundaries lie. Considerable criticism has been published on this extraordinary era, but little programmatic analysis has assessed comprehensively the literary and critical theoretical output to help readers navigate the labyrinth of critical pathways. In addition to ensuring broad coverage of many essential texts, *The Cambridge Companion to 21st Century American Fiction* offers state-of-the-field analyses of contemporary narrative studies that set the terms of current and future research and teaching. Individual chapters illuminate critical engagements with emergent genres and concepts, including flash fiction, speculative fiction, digital fiction, alternative

Backwoodsmen as Ecocritical Motif in French Canadian Literature Anne Rehill, 2016-08-30 In New France and early Canada young men who ventured into the forest to hunt and trade with Amerindians coureurs de bois runners of the woods later traveling in big teams of canoes voyageurs were known for their independence Often described as half wild themselves they linked the European and Indian societies eventually helping to form a new culture with elements of both From an ecocritical perspective they represent both negative and positive aspects of the human historical trajectory because in addition to participating in the environmentally abusive fur trade they also symbolize the way forward through intercultural connections and business relationships The four novels analyzed here Joseph Charles Tach s *Forestiers* et

voyageurs Moeurs et l gendes canadiennes 1863 Louis H mon s Maria Chapdelaine 1916 L o Paul Desrosiers Les Engag s du Grand Portage 1938 and Antonine Maillet s P lagie la Charrette 1979 portray the backwoodsmen operating in a collaborative mode within the realistic context of the need to make money They entered folklore through the 19th century literary efforts of Tach and others to construct a distinct French Canadian national identity then in an unstable and continually disrupted process of formation Their entry into literature necessarily brought their Amerindian business and personal partners thus making intercultural connections a foundation of the national identity that Tach and others strove to construct and also mirror As figures in literature they embody changing ideas of the self and of the cultures and ethnicities that they connect both physically and in an abstract sense Because constructions of self identity result in behavior studying this dynamic contributes to ecocritical efforts to better understand human behavior toward both ourselves and our environment The woodsmen and their Amerindian partners occupy the intriguing position of contributing to both damage and greater acceptance of the cultural Other the latter of which holds the promise of collaboration and joint searches for sustainable solutions Thus coureurs de bois and voyageurs far from perfect models can continue to serve as guides today *Talking Book Topics* ,2014 Fossil Fuels Liz Gogerly,2013 Can you imagine what our lives would be like after we run short of vital fossil fuels What would happen to our transport to the way we produce and distribute food and to the many machines and gadgets we use How would people communities and countries respond to shortages of energy This book traces the possible consequences of a global event on this scale with ideas and evidence based on similar scenarios that are a part of fact and fiction
