Weathercock Glen Duncan, 2003 This is the confession of Dominic Francis Hood Roman Catholic sadist conspirator to murder witness to a miracle Dominic's childhood had the usual cardinal points the love of his family a vague belief in God a general curiosity an emerging libido But after he witnesses a miracle performed by Father Ignatius Malone Dominic realises some part of him is skewed Instead of becoming attracted to good Dominic finds himself stimulated by the idea of other people's pain And he knows that the mere fantasy will never be enough WEATHERCOCK is the great modern moral inquiry by one of England's brightest and most confronting young novelists By turns hilarious appalling celebratory and sad it is an investigation of profound temptations and those human weapons sometimes formidable sometimes frail we bring to bear against them

web firstly if there are two independent events then we multiply the probability of the first event with the probability of the other for instance if there are three dice then what is the probability of getting three 5s the probability of getting a single 5 is $\frac{1}{6}$ then the probability of getting 3 5s is $\frac{1}{6} \times \frac{1}{6} \times \frac{1}{6} = \frac{1}{216}$

web as seen above the geometric probability distribution is given by $p \times x^1 p \times x^1 p$ express $p \times x^x$ for $x = 1, 2, n$ to obtain $p \times x^1 p \times x^2 p \times x^3 p \times x^n$ we note that the above are the terms of a geometric sequence hence
