Cost Management A Strategic Emphasis 6 Edition:

Strategic Pricing and Management Accounting David Dugdale, 2022-11-11 Management accountants should have a key role to play in developing and executing pricing strategy and policy. However, their historical focus on costing and operations means that their potential as business partners with marketing and sales professionals is easily overlooked. This book focuses on how management accountants can help key stakeholders in the formulation and execution of pricing policy and conversely on showing managers responsible for pricing decisions how they could be helped by management accountants. It equips management accountants with a unique overview of pricing theory, the practical quantitative techniques they should know, and the value they can bring to the pricing function. The book analyses segmentation, value to customer, price value maps, segmental pricing, product differentiation, and dynamic pricing with traditional economic theory, showing how these ideas have implications for management accountants and the value that they can bring to the business. Differences in customer value have been integral to economic theory for decades, and price discrimination, the technique of charging different prices to different customers for the same or similar goods, is well established. This observation provides the central core of this book. The methods of price discrimination are set out in detail, showing how management accountants can bring their analytical skills to bear in helping executives and pricing professionals take advantage of differences in customer valuation to improve profits. The book provides a thorough overview of the field and offers a good introduction for researchers and students. Equally, the book shows managers, marketers, and pricing professionals how management accountants can assist them in delivering better pricing practice. *EBOOK: Cost Management: Strategies for Business Decisions, International Edition* Marc Wouters, Frank Selto, Ronald Hilton, Michael Maher, 2012-07-16 This book is an adaptation of the successful US text *Cost Management* by Hilton, Maher, and Selto, written specifically for an international audience. Major improvements include diverse and truly international examples of organizations. Examples used throughout the book are from all over the world and represent manufacturing, retail, not-for-profit, and service firms in many different countries. Completely restructured and rewritten text. The book has been rewritten, restructured, and also shortened significantly to align content closer with international courses. Integral use of spreadsheets. Spreadsheet software is used for explaining techniques and making applications more realistic. In-depth research. Summaries of international research studies that address important cost management issues have been updated, and more references to recent research findings have been added. Intuitive explanation of accounting. The authors show directly how events impact the balance sheet and profit and loss account.

Cost Management Edward Blocher, Kung H. Chen, W. Thomas Lin, 2002 This textbook offers strategic management topics in conjunction with traditional cost accounting material. Over the last decade, much research has been published that redefines the role of the cost accountant with the organisation. This research suggests that firms today are looking for accountants who understand the needs of management and can provide input in decision making. The authors include

discussions about strategy and decision making as well as research from prominent professionals such as Michael Porter and John Shank The distinguishing features of this book are its strategic cost management framework and the emphasis on using cases *Transferring Information Literacy Practices* Billy Tak Hoi Leung,Jingzhen Xie,Linlin Geng,Priscilla Nga Ian
