Taxation and Financing Public Health Lyla Latif, 2023-11-25 Islamic Wealth Taxation and Financing Public Health is an eye opening and thought provoking book that boldly explores new possibilities for funding public health initiatives in countries where Islam isn't the predominant religion. In this case Kenya serves as the focal point. Written by a Pan African Muslim woman, this book is a must read for anyone curious about innovative ways to improve public health without overburdening taxpayers. The author delves into the concept of zakat, an Islamic wealth tax, and investigates how it could be used as a source of revenue to boost public health in non-Islamic states like Kenya. By shedding light on the inner workings of the Kenyan legal system, the book highlights the importance of understanding local power dynamics, cultural and religious beliefs, and political structures when examining legal issues. It's a fascinating look at how different legal frameworks can come together to tackle complex challenges, which brings together insights from human rights law, Islamic law, and constitutional law, showcasing the potential for interdisciplinary collaboration in solving real-world problems. One of the reasons this book is so timely and important is its alignment with global development goals such as the United Nations Sustainable Development Goals (SDGs), the African Union Agenda 2063, and National Development Plans. These initiatives all emphasise the need for countries to find new local funding sources without overtaxing their citizens. Exploring zakat as a potential solution in Kenya is particularly interesting given the country's influence in East Africa and the potential impact of such a development in the region.

The Status of Student Involvement in University Governance in Kenya Mulinge, Munyae M., Arasa, Josephine N., 2017-05-05 This book examines the concept of the democratization of governance in universities in Kenya, with particular emphasis on students' involvement in governance processes and decision making. Data were collected from members of the student community utilizing a structured self-administered questionnaire and from purposively selected key informants and focus group discussants drawn from Kenyatta University representing the public sector and the United States International University representing the private sector. The guiding argument for the study was that shared governance, one of the principles of good governance, is critical in enabling the universities to deliver their visions and the missions effectively. The results revealed that while in principle Kenyan universities have embraced democratic governance in which all stakeholders, including students, have a role to play, in practice they continue to violate the core principles of good governance, particularly shared governance. Specifically, students who are major stakeholders in university education are largely excluded from significant structures of governance, thereby limiting their influence and participation. Although their representation is mainly provided via student self-governance organs, unions, associations, and/or councils, their effectiveness is undermined considerably by the lack of trust and confidence of the student body and the unending manipulation by top university administrators and external political actors. Student active involvement in decision making is mainly confined to lower levels such as the school faculty and departmental programme. The authors call for a paradigm shift in the involvement of students in the governance of universities in ways that discourage the current culture of tokenism and political correctness that

characterizes public and private universities in Kenya

Thin Film Coatings Fredrick Madaraka Mwema, Tien-Chien Jen, Lin Zhu, 2022-06-19 Thin Film Coatings Properties Deposition and Applications discusses the holistic subject of conventional and emerging thin film technologies without bias to a specific technology based on the existing literature.
