The Origin and Growth of Geography as a discipline at South Africa Universities Gustav Visser, Ronnie Donaldson, Cecil Seethal, 2016-09-20 **Handbook of Open Universities Around the World** Sanjaya Mishra, Santosh Panda, 2025-06-27

The Handbook of Open Universities Around the World is the first collection to provide a comprehensive and critical overview of open universities internationally. Over 80 open universities have been established across five continents to provide a distance orientated class inclusive and high quality education for learners left behind by existing formal systems for higher and continuing education and lifelong learning. This mission has been continually reshaped by major developments in open education learning technologies and online social networking as well as by the evolution of specific concerns such as the massification of education, employability, financial trends, artificial intelligence and development agendas on the regional, national and global levels. This landmark volume analyzes and reflects on the planning, organization, management, pedagogic, skilling and employability and accreditation dimensions of 47 open universities in relation to their national and institutional contexts, the internationalization of education and the integration of advanced learning technologies. Featuring contributions by internationally recognized scholars, practitioners and educational administrators, this authoritative resource provides insights into the business model, finances, operations, instructional systems, enrollment patterns, learner supports, quality assurance, professional development and more of today's open universities. Through historical trajectories, institutional profiles, case studies, lessons learned and best practices, this book provides rich analytical perspectives on the status and challenges of single mode distance learning universities as an educational phenomenon while unpacking the premise of openness itself. This Handbook is primarily written for planners, managers, administrators, instructional designers and teaching faculty at single mode distance teaching universities who are seeking to sustain their institutions in a period of rapid change, government policymakers, training organizations, technology providers and education think tanks who are in need of authentic and research based information on technology enabled learning modeled by open universities around the world and graduate students, teaching faculty and scholars who are affiliated with online and distance education learning design and technology, higher education planning and management, adult education and lifelong learning and education policy and future studies. Chapter 54 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license. Beyond Imagination Zamanzima Mazibuko, 2018-12-28. Nanotechnology is sweeping the world. This science of very small particles which includes genetic modification and the reconfiguring of the arrangement of atoms presents possibilities beyond imagination. It also has huge implications for all South Africans, especially at home. How exactly is this new technology playing out in South Africa? In countries like India, nanotechnology is being supported as a source of income and innovation. It

has the potential to improve both the human condition and a countrys productivity and competitiveness Is South Africa doing what it should and could to foster nanotechnology and biotechnology and to advance bioeconomies within the country And what does the new technology mean for us as consumers How many of us know that this technology is already being employed in substances like suntan cream and lipstick with potential health implications for users The application of nanotechnology poses risks as well as huge benefits so we need to be particularly vigilant of the ethics and dangers of it This book provokes discussion around these important topics and relays eyeopening information to those of us who thought all of this was sci fi ICEL 2018 13th International Conference on e-Learning Professor Eunice Ivala,2018-07-05
