1990 2000 Distributive Protocols 2000 2010 and Expansive Protocols 2010 2020 These three periods shouldn't be read as three hermetic and concatenated monades but as three different modulations of the same narrative that is as three overlapping and coexisting systems whose peaks of intensity occur in three different decades However the main purpose of this book is not limited to unveiling the ethos of these three conjugations It also aims at using this framework as a time field a narrative map that moves from the classificatory to the cartographical in order to vectorize the last 30 years of experimental architecture In this sense this book argues that this threefold set of protocols represents the progressive attempt to constitute critical interiorities looking for and produced through interactions that are increasingly more intimate and whose agents are increasingly more diverse A tendency oriented towards the consolidation of an intimacy between strangers that highly resonates with the cultural and technological landscape in which experimental architecture operates
