

Electricity can exist as static electricity or travel as a current through a conductor.

Week 1

Where does lightning come from?

This week, students learn that lightning is a dramatic example of static electricity caused by atoms to store in clouds gain big and losing electrons. Atoms that gain electrons gain a negative charge, which then discharged to a spark of electricity that we see as lightning. The shock you sometimes get when you touch metal is also an example of static electricity. The strength of the shock is actually quite strong, but since it is so brief, it is only annoying, not dangerous.

Day One

Vocabulary: electricity

Distribute page 157 and introduce the vocabulary word. Have volunteers read the introduction aloud. Then have students complete activity A, invite volunteers to share their responses. Then have students complete activity B independently. For activity C, pair students or complete the activity as a group, if needed. Review the answers together.

Day Two

Vocabulary: atom, electron, proton

Distribute page 160, introduce the vocabulary, and have volunteers read the introduction aloud. Use the diagram on the page to point out how protons and electrons are often represented by plus and minus signs. Then have students complete the activities independently. Review the answers together.

Day Three

Vocabulary: charge, static electricity

Distribute page 161 and introduce the vocabulary. Then have volunteers read the introduction aloud. Confirm students' understanding of how something gains or loses a charge before having them complete the activities. Review the answers together.

Day Four

Activate prior knowledge by asking students if they have ever gotten a shock when they touched something metal. Distribute page 162 and have volunteers read the introduction aloud. Then have students complete the activities. Invite volunteers to share their responses to activity B.

Day Five

Tell students they will review everything they have learned about lightning and static electricity. Have them complete page 163. Go over the answers together.
