 - 24 activity pages
 - teacher lesson plans
- Content vocabulary, comprehension, and visual literacy practice
- 6 hands-on activities

Day 1

Weekly Question

Why does garbage smell?

Everyone recognizes the smell of rotten garbage. It stinks! But that smell tells you that **decomposers** are at work. Decomposers are organisms that break down waste and dead matter, such as banana peels or wilted lettuce leaves. Decomposers are found everywhere, not just in trash cans. Decomposers play a vital role in the ecosystem.

Name _____

Day 2

Weekly Question

Why does garbage smell?

Bacteria are the smallest decomposers, too small to see without a microscope, but they are the most numerous. There are many kinds of bacteria, and they live in every ecosystem on the planet, from oceans to deserts to your trash can.

Because bacteria are so small and simple, they don't have mouths with which to eat. Instead, bacteria release chemicals that break down matter into small parts that they can **absorb**.
