

The National Geography Standards

The National Geography Standards includes six essential elements that highlight the major components of geography. Under the six major categories are the eighteen standards that focus on general areas in geography that children are expected to know and understand.

Essential Element 1: The World in Spatial Terms

Geography studies the relationships between people, places, and environments by mapping information about them into a spatial context. The geographically informed person knows and understands the following:

- Standard 1** **Weeks 1–8**
how to use maps and other geographic representations, tools, and technologies to acquire, process, and report information from a spatial perspective,
 - Standard 2** **Weeks 9–10**
how to use mental maps to organize information about people, places, and environments in a spatial context, and
 - Standard 3** **Weeks 11–12**
how to analyze the spatial organization of people, places, and environments on Earth's surface.
-

Essential Element 2: Places and Regions

The identities and lives of individuals and peoples are rooted in particular places and in those human constructs called regions. The geographically informed person knows and understands the following:

- Standard 4** **Weeks 13–18**
the physical and human characteristics of places,
 - Standard 5** **Weeks 19–22**
that people create regions to interpret Earth's complexity, and
 - Standard 6** **Weeks 23–24**
how culture and experience influence people's perceptions of places and regions.
-

Essential Element 3: Physical Systems

Physical processes shape Earth's surface and interact with plant and animal life to create, sustain, and modify the ecosystems. The geographically informed person knows and understands the following:

- Standard 7** **Week 25**
the physical processes that shape the patterns of Earth's surface, and
- Standard 8** **Week 26**
the characteristics and spatial distribution of ecosystems on Earth's surface.
