The Schenley Experiment Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt Integrated decades before Brown v Board of Education Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace's reinvigorated school Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America's oldest public schools *CTET English & Hindi Language 9 Year-wise Solved Papers 1 & 2* Disha Experts, 2019-11-06 [The State of the Art in Creative Arts Therapies](#) Tal Shafir, Hod Orkibi, Felicity Anne Baker, David Gussak, Girija Kaimal, 2020-07-08 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least ten articles all centered on a particular subject With their unique mix of varied contributions from Original Research to Review Articles Frontiers Research Topics unify the most influential researchers the latest key findings and historical advances in a hot research area Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office frontiersin.org/about/contact

Expanding Fields of Architectural Discourse and Practice Matthew Butcher, Megan O'Shea, 2020-11-27 Expanding Fields of Architectural Discourse and Practice presents a selection of essays architectural experiments and works that explore the diversity within the fields of contemporary architectural practice and discourse Specific in this selection is the question of how and why architecture can and should manifest in a critical and reflective capacity as well as to examine how the discipline currently resonates with contemporary art practice It does so by reflecting on the first 10 years of the architectural journal P E A R 2009 to 2019 The volume argues that the initial aims of the journal to explore and celebrate the myriad forms through which architecture can exist are now more relevant than ever to contemporary architectural discourse

and practice Included in the volume are architectural practitioners design researchers artists architectural theorists historians journalists curators and a paleobiologist all of whom contributed to the first seven issues of the journal Here they provide a unique presentation of architectural discourse and practice that seeks to test new ground while forming distinct relationships to recent and more longstanding historical legacies Praise for Expanding Fields of Architectural Discourse and Practice The story told by the authors of this work can thus be considered as the central tool of an architectural transgression Critique d art

Music and the Functions of the Brain: Arousal, Emotions, and Pleasure Mark Reybrouck,Tuomas Eerola,Piotr Podlipniak,2018-04-12 Music impinges upon the body and the brain As such it has significant inductive power which relies both on innate dispositions and acquired mechanisms and competencies The processes are partly autonomous and partly deliberate and interrelations between several levels of processing are becoming clearer with accumulating new evidence For instance recent developments in neuroimaging techniques have broadened the field by encompassing the study of cortical and subcortical processing of the music The domain of musical emotions is a typical example with a major focus on the pleasure that can be derived from listening to music Pleasure however is not the only emotion to be induced and the mechanisms behind its elicitation are far from understood There are also mechanisms related to arousal and activation that are both less differentiated and at the same time more complex than the assumed mechanisms that trigger basic emotions It is imperative therefore to investigate what pleasurable and mood modifying effects music can have on human beings in real time listening situations This e book is an attempt to answer these questions Revolving around the specificity of music experience in terms of perception emotional reactions and aesthetic assessment it presents new hypotheses theoretical claims as well as new empirical data which contribute to a better understanding of the functions of the brain as related to musical experience

Puppet and Spirit: Ritual, Religion, and Performing Objects Claudia Orenstein,Tim Cusack,2024-10-17 This anthology of essays a companion to Puppet and Spirit Ritual Religion and Performing

Objects Volume I aims to explore the many types of relationships that exist between puppets broadly speaking and the immaterial world. The allure of the puppet goes beyond its material presence as historically and throughout the globe many uses of puppets and related objects have expressed and capitalized on their posited connections to other realms or ability to serve as vessels or conduits for immaterial presence. The flip side of the puppet's troubling uncanniness is precisely the possibilities it represents for connecting to discarnate realities. Where do we see such connections in contemporary artistic work in various mediums? How do puppets open avenues for discussion in a world that seems to be increasingly polarized around religious values? How do we describe, analyze, and theorize the present moment? What new questions do puppets address for our times and how does the puppet's continued entanglement with these concerns trouble or comfort us? The essays in this book from scholars and practitioners provide a range of useful models and critical vocabularies for addressing this aspect of puppet performance, further expanding the growing understanding and appreciation of puppetry generally. This book, along with its companion volume, offers for the first time robust coverage of this subject from a diversity of voices, examples, and perspectives.

within the parameters of specific educational programs to address explicitly defined learning objectives. These groups are often small scale and achieve tasks through cooperative or collaborative learning. Cooperative learning involves students dividing roles and responsibilities between group members so learning becomes an independent process and outcome. On the other hand, collaborative learning involves students working together by developing shared meanings and knowledge to solve a task or problem. From this perspective, learning is conceptualized as both a social process and individual outcome. That is, collaborative learning may facilitate individual student conceptual understanding and hence lead to higher academic achievement. The empirical evidence is encouraging as has been shown that students working collaboratively tend to achieve higher grades than students working independently. However, the above perspectives on student engagement assume that groups are formed within the confines of formal learning environments. e.g. lecture theaters involve students on the same degree program have the explicit function of achieving a learning task and disband once this has been achieved. However, students may also use existing social networks such as friendship groups as a mechanism for learning which may occur outside of formal learning environments. There is an extensive literature on the role and benefits of friendship groups on student learning within primary and secondary education but there is a distinct lack of research within higher education. This ebook is innovative and ambitious and will highlight and consolidate the current understanding of the role that student based engagement behaviors may serve in effective pedagogy. A unique aspect of this research topic will be the fact that scholars will also be welcome to submit articles that describe the efficacy of the full range of approaches that have been employed to facilitate student engagement across the sector.

[Making a Canon](#) Janice Leoshko, 2024-12-11 The story of how one scholar's experiences in Sri Lanka shaped the contours of the Buddhist visual canon. An early interpreter of Buddhist art to the West, Ananda Kentish Coomaraswamy laid the foundation of what would become the South Asian visual canon, particularly through his efforts to understand how Buddhist art emerged and developed. In *Making a Canon*, Janice Leoshko examines how Coomaraswamy's experience as the director of a mineralogical survey in Sri Lanka shaped his understanding of South Asian art and religion. Along the way, she reveals how Coomaraswamy's distinctive repetition of Sri Lankan visual images in his work influenced the direction of South Asia's canon formation and left a lasting impression on our understanding of Buddhist art.

A Contemporary History of Women's Sport, Part One Jean Williams, 2014-04-24 This book is an historical survey of women's sport from 1850-1960. It looks at some of the more recent methodological approaches to writing sports history and raises questions about how the history of women's sport has so far been shaped by academic writers. Questions explored in this text include: What are the fresh perspectives and newly available sources for the historian of women's sport? How do these take forward established debates on women's place in sporting culture and what novel approaches do they suggest? How can our appreciation of fashion, travel, food and medical history be advanced by looking at women's involvement in sport? How can we use some of the current ideas and methodologies in the recent literature on the history and sociology of sport in

order to look afresh at women's participation Jean Williams's original research on these topics and more will be a useful resource for scholars in the fields of sports women's studies history and sociology
