computational puzzles can help When considering all the above purposes the result is that this workbook has become a huge workbook How did I get started to create this workbook I received my university education in Taiwan and later received my Science of Statistics master degree in the US My working of teaching and research of math at my own learning Centre Ho Math Chess based in Canada has offered me insights on how math is taught differently in different countries Integrated game is a good way of learning math in our case chess is integrated into our worksheets not a totally separate subject This is one uniqueness of our series of Ultimate Math Contest Preparation Problem Solving Strategies and Math IQ Puzzles workbook Since each of our workbooks has many different parts so students could pick other materials other than math contest Why teachers coaches parents or students should buy this workbook We need a workbook which not only just teach math contest it should also be fun for children to work on and at the same time to enhance their brain power This is the vision which leads me to create this workbook and if you agree with my idea and view then this world's first 3 in 1 integrated math contest problem solving strategies and fun math IQ workbook is for you and your student or child
