Distributed Classroom David A. Joyner, Charles Isbell, 2023-08-01 A vision of the future of education in which the classroom experience is distributed across space and time without compromising learning What if there were a model for learning in which the classroom experience was distributed across space and time and students could still have the benefits of the traditional classroom even if they can't be present physically or learn synchronously In this book two experts in online learning envision a future in which education from kindergarten through graduate school need not be tethered to a single physical classroom The distributed classroom would neither sacrifice students' social learning experience nor require massive development resources It goes beyond hybrid learning so ubiquitous during the COVID 19 pandemic and MOOCs so trendy a

few years ago to reimagine the classroom itself David Joyner and Charles Isbell both of Georgia Tech explain how recent developments including distance learning and learning management systems have paved the way for the distributed classroom They propose that we dispense with the dichotomy between online and traditional education and the assumption that online learning is necessarily inferior They describe the distributed classroom s various delivery modes for in person students remote synchronous students and remote asynchronous students the goal would be a symmetry of experiences with both students and teachers able to move from one mode to another With The Distributed Classroom Joyner and Isbell offer an optimistic learner centric view of the future of education in which every person on earth is turned into a potential learner as barriers of cost geography and synchronicity disappear **Teach Yourself How to Learn** Sandra Yancy

McGuire,2023-07-03 Following up on her acclaimed Teach Students How to Learn that describes teaching strategies to facilitate dramatic improvements in student learning and success Sandra McGuire here presents these secrets direct to students Her message is that Any student can use simple straightforward strategies to start making A s in their courses and enjoy a lifetime of deep effective learning Beginning with explaining how expectations about learning and the study efforts required differ between college and secondary school the author introduces her readers through the concept of metacognition to the importance and powerful consequences of understanding themselves as learners This framework and the recommended strategies that support it are useful for anyone moving on to a more advanced stage of education so this book also has an intended audience of students preparing to go to high school graduate school or professional school In a conversational tone and liberally illustrated by anecdotes of past students the author combines introducing readers to concepts like Bloom s Taxonomy to illuminate the difference between studying and learning fixed and growth mindsets as well as to what brain science has to tell us about rest nutrition and exercise together with such highly specific learning strategies as how to read a textbook manage their time and take tests With engaging exercises and thought provoking reflections this book is an ideal motivational and practical text for study skills and first year experience courses *Much*
