Of all the cultural revolutions brought about by the development of printing technology during the sixteenth century perhaps the most remarkable but least understood is the purported rise of European vernacular languages It is generally accepted that the invention of printing constitutes an event in the history of language that has profoundly shaped modernity and yet the exact nature of this transformation the mechanics of the event has remained curiously unexamined In *The Prosthetic Tongue* Katie Chenoweth explores the relationship between printing and the vernacular as it took shape in sixteenth century France and charts the technological reinvention of French across a range of domains from typography orthography and grammar to politics pedagogy and poetics Under François I the king known in his own time as the Father of Letters both printing and vernacular language emerged as major cultural and political forces Beginning in 1529 French underwent a remarkable transformation as printers and writers began to reimagine their mother tongue as mechanically reproducible The first accent marks appeared in French texts the first French grammar books and dictionaries were published phonetic spelling reforms were debated modern Roman typefaces replaced gothic scripts and French was codified as a legal idiom This was Chenoweth argues a veritable new media moment in which the print medium served as the underlying material apparatus and conceptual framework for a revolutionary reinvention of the vernacular Rather than tell the story of the origin of the modern French language however she seeks to destabilize this very notion of origin by situating the cultural formation of French in a scene of media technology and reproducibility No less than the paper book issuing from sixteenth century printing presses the modern French language is a product of the age of mechanical reproduction **Copy, Copy, Copy** Mark

This collection of ten essays by expert scholars in transatlantic British and American literatures interrogates the diverse meanings the ocean assumed for writers readers and thinkers on both sides of the Atlantic during this period of global exploration and colonial consolidation. The book's introduction offers three critical lenses through which to read nineteenth century Anglophone maritime literature wet globalization which returns the ocean to our discourses of the global salt aesthetics which considers how the sea influences artistic culture and aesthetic theory and blue ecocriticism which poses an oceanic challenge to the narrowly terrestrial nature of green ecological criticism.
