The Code Breaker -- Young Readers Edition Walter Isaacson, Sarah Durand, 2023-03-28 When Jennifer Doudna was a sixth grader in Hilo Hawaii she came home from school one afternoon and found a book that would spark her curiosity in science It was The Double Helix James Watson s account of how he and Francis Crick had discovered the structure of DNA the spiral staircase molecule that carries the genetic instruction code for all forms of life When the time came Doudna focused her studies on what seemed to take a backseat in biochemistry figuring out the structure of RNA a closely related molecule that enables the genetic instructions coded in DNA to express themselves Doudna s expertise led her and her collaborators to develop a revolutionary technique that could actually edit human genes Today gene editing technologies such as CRISP are already being used to eliminate simple genetic defects that cause disorders such as Tay Sachs disease and sickle cell anemia For now however Doudna and her team are lining up against our most immediate threat the coronavirus and you have just been given a front row seat to that race *How to Survive Teaching Health* Kenneth G.
